BOLZONI
The Material Handling Group

1. Bolzoni Group – Management Report
2. Consolidated report – with explanatory notes
3. Statement ex art 154-bis, TUF
4. Draft of the yearly financial statement of Bolzoni SpA
5. Subsidiaries’ financial statement

Group's activity

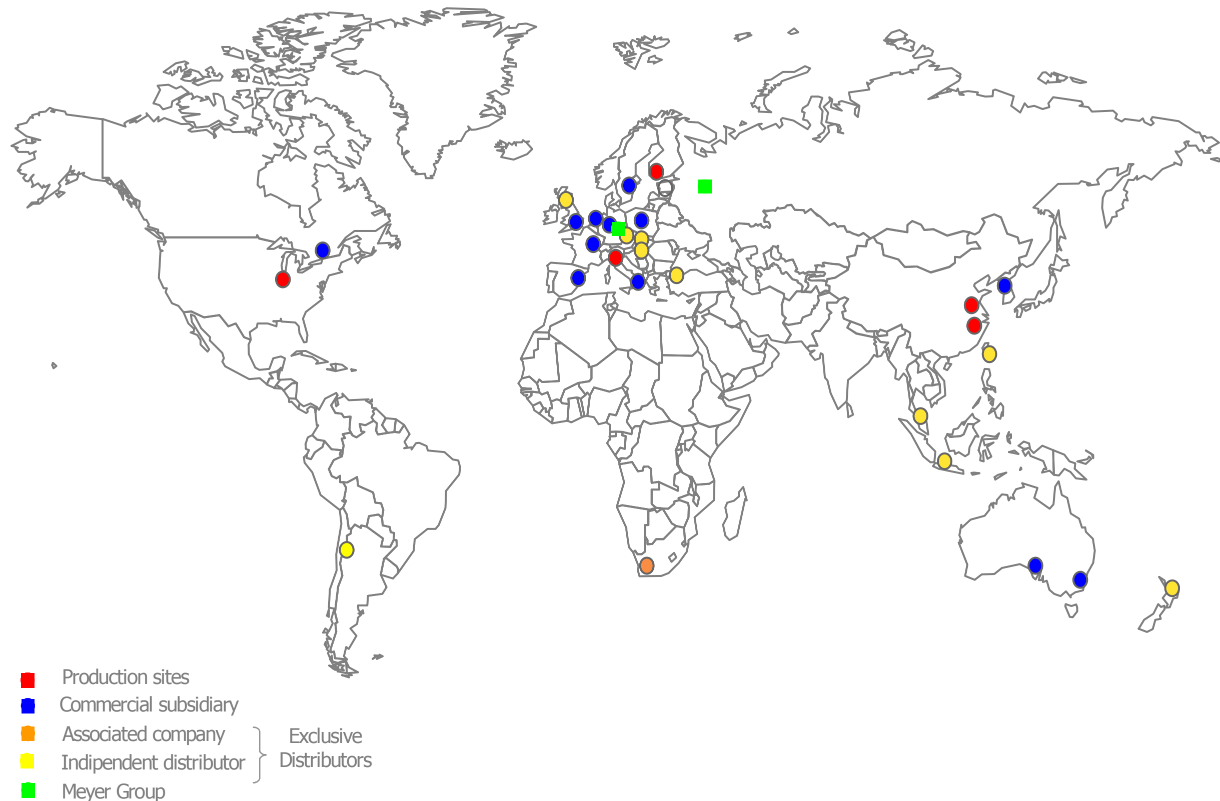
Since the early 1950s the Company has been active in the design, production and distribution of lift truck attachments and industrial material handling equipment.

It therefore operates in a market segment closely linked to logistics and its evolution worldwide.

Today Bolzoni is present in over forty countries worldwide. Its products hold the leading position in the European market for lift truck attachments and it is the second largest manufacturer worldwide in this sector.

The Group offers a wide range of products utilized in industrial material handling and, in particular, lift truck attachments, lifting platforms, forks for lift trucks.

The following diagram shows the presence worldwide of the Group's companies.

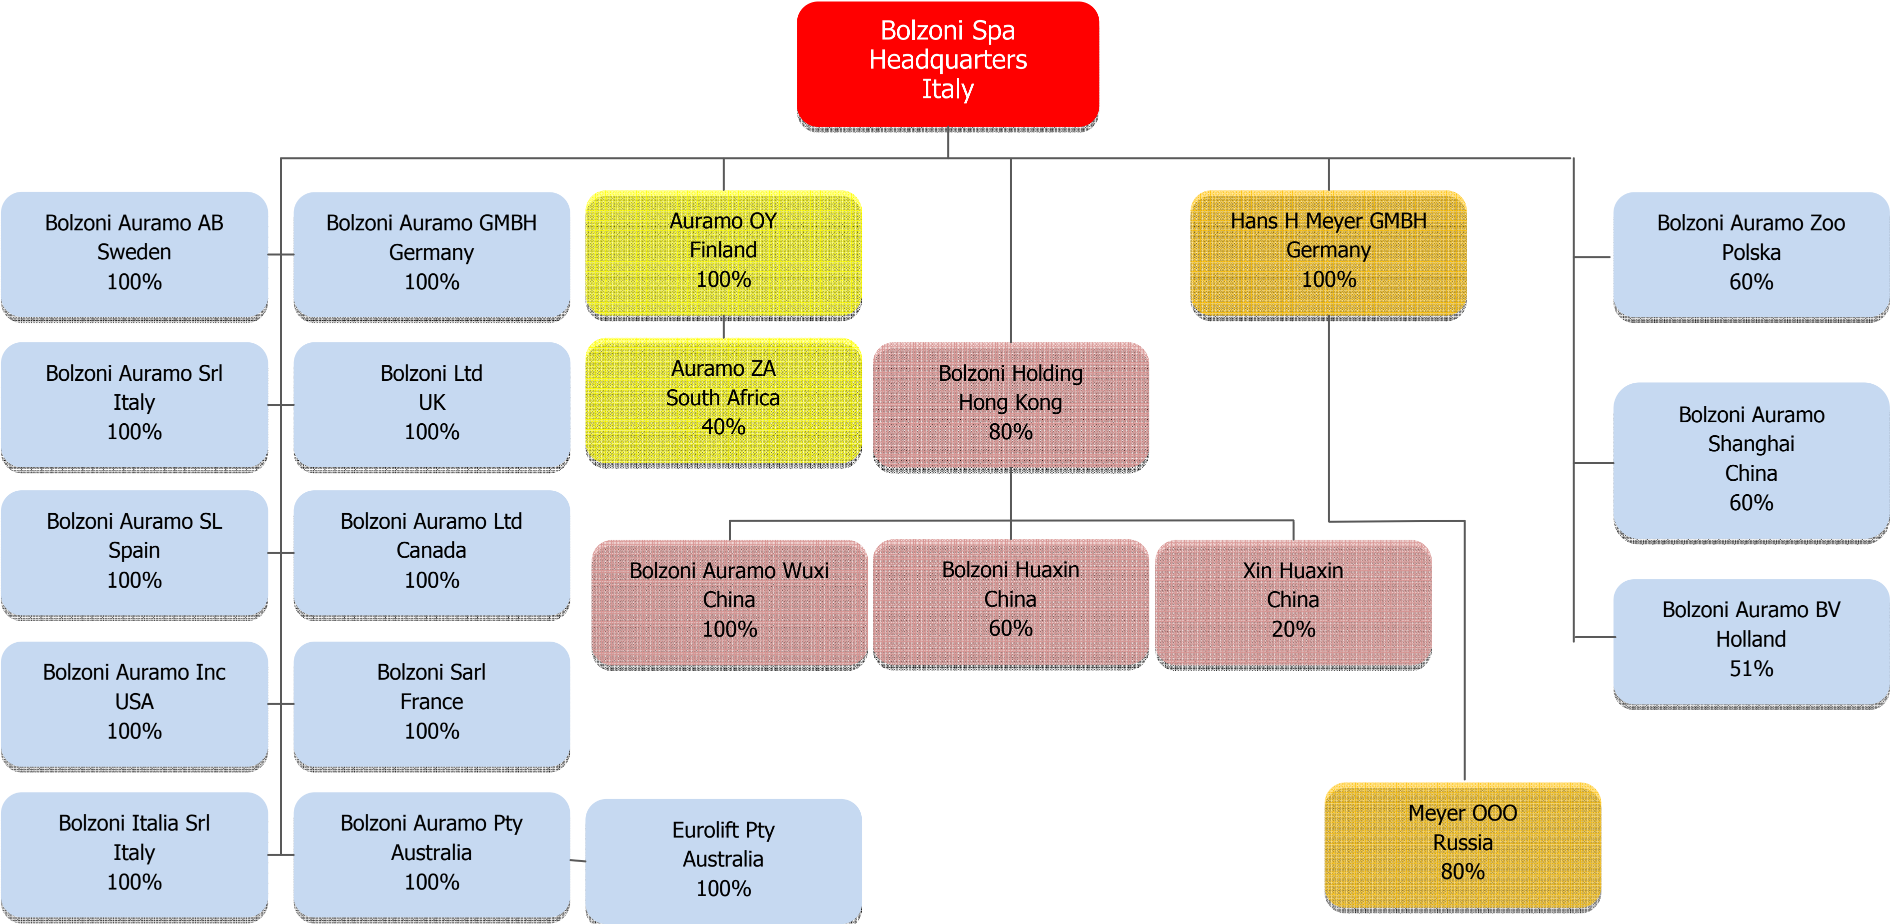


BOLZONI
The Material Handling Group

Group Structure

Bolzoni S.p.A. directly or indirectly , controls twenty companies located in various countries worldwide. Eight of these companies (including the Parent) are production plants situated in Italy, Germany, Finland, U.S.A. and China; thirteen companies have exclusively commercial and distribution activities, directly serving the principal logistics and material handling markets all over the world; one company is a financial holding. Through its subsidiaries or associated companies, the Group is present in a number of countries representing all together 80% of the specific world market.

.



The benchmark market and competitors

The fork lift truck attachment is a highly concentrated market, 90% of which covered by three manufacturers (Cascade, Bolzoni and Kaup).

With reference to the fork lift truck attachment market as a whole, Bolzoni (with approximately 40% of the market) holds the leading position in the European Market followed by the Cascade Corporation, a US company with production plants also in Europe (with a market share of about 28%) whereas on a worldwide level Bolzoni occupies the second position (with a market share of about 25%) preceded by the Cascade Corporation (occupying approximately 50%).

The third position both in Europe and worldwide is held by Kaup (a German manufacturer)

Bolzoni holds the leading position worldwide with regards to the production of integral side shifters, supplied directly to the manufacturers of fork lift trucks (with a market share of around 81%).

During the last 6 years there have been no significant facts that may have considerably modified the structure of the market described above.

Success factors

The factors behind the Group’s success can be summed up in the following 7 points:

- Presence worldwide;
- Leadership in the European attachment market;
- World leadership in integral side shifters:
- Positive effects of globalisation in logistic markets (benchmark market);
- Ample and consolidated customer portfolio;
- Strongly defended sales and distribution network;
- Excellence and quality of products and production procedures.

Human resources

Number of employees

The following table shows the overall number of people employed in the Group companies on 31 December 2013, 2012 and 2011, divided according to the main categories and with a distinction between Italy and abroad.

	31.12.2013			31.12.2012			31.12.2011

Total	**248**	**504**	**752**	**241**	**494**	**735**	**238**	**372**	**610**

Report on the consolidated financial statements for the year ended 31.12.2013

For easier reading, unless otherwise specified, figures are indicated in thousands of euros.

Comments to the Group's main results

Below are the main results of the financial period which ended on 31.12.2013 compared to the financial period 2012.

The following tables contain the management results:

	31.12.2013	*31.12.2012 *restated*	*Variation %*
Revenue	121,172	119,088	+ 1.75%
Ebitda	8,147	9,662	- 15.68%
Ebit	2,758	4,199	- 34.32%
Profit before tax	612	2,671	- 77.09%
Net income	105	1,886	- 94.43%

* following the application as of 1 January 2013 (retrospectively) of the amendment to IAS 19, the figures at 31.12.2012 presented for comparative purposes have been revised as established by IAS 1. For further details please see paragraph "Accounting Principles".

Revenue

Revenue has increased by 1.75% for the year.
The growth of the non-EU countries has compensated the drop in the European market.
The considerable slump in Germany has particularly affected the overall result as it is our main end market

Trends in the benchmark market

According to statistics issued by the association of forklift truck manufacturers, the market we use as our benchmark recorded the following variations in 2013, compared to the previous year 2012:

Geographic area	1st semester	2nd semester	Year
W. Europe	(5.60%)	2.05%	(1.98%)
North America	7.31%	12.68%	10.14%
China	6.76%	21.29%	13.31%
World	3.15%	10.79%	6.83%

Source: International Association of Fork Lift Truck Manufacturers

To be noted is the strong growth of the non-EU countries particularly in the second semester.
Of course, the area with the greatest impact on the company results continues to be Europe.

Market share

The results achieved indicate an evident increase in market shares, acquired mainly in the non-EU markets.

Currency aspects

At the balance sheet date the exchange rate of the Euro against the US dollar, which was 1.32 at 31.12.2012, dropped to 1.38 at 31.12.2013 with an average annual exchange rate of 1.33.
The exchange rate of the Euro against Pound Sterling was 0.82 euros at 31.12.2012 dropped to 0.83 euros at 31.12.2013.

EBITDA

Ebitda, as defined on page 13, followed the trend indicated below during the two periods under examination:

	31.12.
% Ebitda on 2012 turnover * restated	8.11%
% Ebitda on 2013 turnover	6.72%

The drop in Ebitda is essentially due to one-off reorganisation costs for the European sales network amounting to 472,000 euros. The growth opportunities described in the three-year Business Plan approved in March 2013 remain unvaried but are postponed by about 12 months. In support of the Plan, 900,000 euros more of overhead costs have been charged to the period.

Result before tax and net income

During the financial year 2013, despite the hedging instruments used, the exchange rate difference amounted to a negative 804,000 euros against the positive result in 2012 of 25,000 euros.
The Consolidated Financial statements therefore closes with a profit before tax of 612,000 euros, and a net income of 123,000 euros.

Reconciliation of period's result and net equity between Group and Parent

	Net equity	Net income
Parent company financial statements	40,313	1,053
Elimination of profits on intercompany stock (net tax effect)	(1,378)	177

Bolzoni France	56	7	63
Bolzoni Auramo Spain	51	-	51
Bolzoni Auramo Italy	-	-	-
Bolzoni Auramo USA	512	-	512
Bolzoni Auramo Canada	94	-	94
Bolzoni Auramo Poland	3	-	3
Bolzoni Auramo Shanghai	-	-	-
Meyer Group	704	336	1,040
Bolzoni Italia S.r.l.	67	38	105
Bolzoni Holding Hong Kong, Bolzoni Auramo Wuxi and Bolzoni Huaxin	1,441	628	2,069
TOTAL	**4,592**	**1,584**	**6,176**

The investments in tangible fixed assets are mainly related to the purchase of machine tools and equipment.
The investments in intangible fixed assets made by Bolzoni S.p.A., by Auramo in Finland, by Meyer in Germany and by Bolzoni Auramo Wuxi in China mainly refer to the capitalization of development costs of new products, new production lines and new software.

Research and development

During the year 2013, the Company continued its research and development activity and directed its efforts mainly on projects which we believe to be particularly innovative:

- Activities regarding the conception, feasibility study, research, development, construction of prototypes, and testing of following new products characterized by innovative technological contents and the technological improvement of existing products:
  - new tilting integral side shifter
  - new Jungheinrich load extender
  - new double shaft-guided fork positioner
  - new 42 ton parallel clamp for carton/waste , as extension of the range, 22, 24 and 34 tons
  - new integral Jungheinrich bench mast side shifter
  - 20 ton capacity carton clamp
  - 28 and 40 ton rotating hydraulic fork clamp to complete the range
  - 150 ton rotators
  - 40 ton block clamp for auto-compensating pads
  - class 3 and 4 integral positioners
  - 22 ton clamps with frames and increased visibility

The projects have been developed in the production plant situated in Podenzano (PC), via I Maggio 103.

For the development of the above projects the Company has incurred costs for a total amount of 703,504.81 euros.

On this amount the Company intends taking advantage of the tax reduction on IRAP art. 11 of the Legislative Decree n° 446 passed on 15 December 199 7, modified by art. 17 of the Legislative Decree n°247 passed 18 November 2005 implemented b y Law 296/06 art. 1 paragraph 266.
The above-described research and development activity will continue in 2014.

We trust that the favourable effects produced by these innovations will generate positive results in terms of turnover and also positive effects on the company's economy.

Inventory at 31.12.2013

Stock levels at 31.12.2013 have remained basically stable compared to the figure at 31.12.2012; the entire increase is due to the development of activities in the China production plants

	31.12.2013	31.12.2012

- *of which related to Intesa Sanpaolo*	-	*477*	*(477)*
D. CASH AND CASH EQUIVALENTS	**11,039**	**3,513**	**7,526**
E. Financial receivables	11	187	(176)
F. Current bank debts	(10,342)	(11,729)	1,387
- *of which related to Intesa Sanpaolo*	-	*(3,014)*	*3,014*
G. Current part of non-current debt	(15,177)	(4,960)	(10,217)
- *of which related to Intesa Sanpaolo*	-	*(1,707)*	*1,707*
I. CURRENT FINANCIAL DEBTS	**(25,508)**	**(16,502)**	**(9,006)**
J. CURRENT NET FINANCIAL POSITION	**(14,469)**	**(12,989)**	**(1,480)**
Financial assets held until maturity	-	-	-
K. NON-CURRENT FINANCIAL DEBT	(14,311)	(13,465)	(846)
- *of which related to Intesa Sanpaolo*	-	*(1,483)*	*1,483*
N. NON-CURRENT NET FINANCIAL POSITION	**(14,311)**	**(13,465)**	**(846)**
NET FINANCIAL POSITION (NET FINANCIAL DEBTS)	**(28,780)**	**(26,454)**	**(2,326)**
- of which related to Intesa Sanpaolo	**-**	***(5,727)***	**5,727**

Consolidated net financial position has increased from 26.454 euros at 31.12.2012 to 28.780 euros at 31.12.2013.
The increase in financial debts is amply justified by the overall investments amounting to 6.152 euros, 2.069 euros of which for the two China plants.

Definition of alternative performance indicators

As per CONSOB's Release n° DEM/6064293 dated 28 July 2007, below we have defined the alternative performance indicators employed to illustrate the Group's equity, financial and economic trend.

Gross operating result (Ebitda): defined as the difference between sales revenue and costs related to consumption of materials, services, labour and to the net balance of operating income/charges. It represents the margin achieved before depreciation, financial results and tax.

Operating result (Ebit): defined as the difference between the gross operating result and the value of depreciation/write-downs. It represents the margin achieved before financial results and tax.

Net invested capital: represents the algebraic sum of fixed assets, current assets (net of cash in hand and equivalent) and current liabilities (net of financial payables) and long term funds.

Net financial position: represents the algebraic sum of cash in hand and equivalent, current and non-current financial receivables and payables. It should be noted that the Net Financial Position is calculated as per Consob Resolution n. DEM/6064313 on 28 July 2006.

Ebitda and Ebit

Ebitda corresponds to the Gross Operating Result as defined above.
Ebit coincides with the Operating Result.

Performance indicators

To ensure a better understanding of the Group's and the Parent's results, below are the figures for some of the indicators usually employed in financial analysis:

Profitability indexes consolidated financial report	31.12.2013	31.12.2012
ROE *Return on equity*	0.26%	4.59%
ROI *Return on investment*	4.01%	6.21%

Profitability indexes parent's financial report	31.12.2013	31.12.2012
ROE *Return on equity*	4.94%	6.03%
ROI *Return on investment*	3.26%	3.89%

ROE *(Return on Equity)*: calculated as the ratio between net result and shareholder's equity. It expresses the profitability of the investment in the company's capital compared to investments of other nature, or rather whether or not the investment in the Group is convenient.

ROI: this is calculated as the ratio between the operating result (Ebit) and the invested capital (net of investments in non-characteristic activities which is not the case for the Bolzoni Group). It indicates the company's ability to generate profits through activities related to its business.

Liquidity indexes consolidated financial report			
		31.12.2013	**31.12.2012**
DI	*Current ratio*	1.20	1.29
LS	*Quick ratio*	0.75	0.75

Liquidity indexes parent's financial report			
		31.12.2013	**31.12.2012**
DI	*Current ratio*	0.74	0.91
LS	*Quick ratio*	0.59	0.71

DI: calculated as the ratio between current assets and current liabilities and indicates the company's ability to use its quick assets to deal with current liabilities.

LS: calculated as the ratio between current assets without inventory and current liabilities; it is used to assess the security of a company from the financial standpoint.

Indexes of financial solidity consolidated financial report			
		31.12.2013	**31.12.2012**
CI	*Fixed asset self-coverage ratio*	0.82	0.85
LEV	*Leverage*	1.72	1.64
IN	*Indebtedness ratio*	0.72	0.64

Indexes of financial solidity parent's financial report			
		31.12.2013	**31.12.2012**
CI	*Fixed asset self-coverage ratio*	0.68	0.71
LEV	*Leverage*	1.52	1.55
IN	*Indebtedness ratio*	0.52	0.55

CI*:* calculated as the ratio between shareholders' equity and fixed assets; it indicates the ability of a company's own capital to meet its investment requirements.

***LEV** (Leverage):* calculated as the ratio between invested capital and net shareholders' equity and therefore indicates the company's level of debt. The higher the value of the index the greater the risk for the company.

IN: calculated as the ratio between net financial indebtedness (as defined above) and net shareholders' equity and indicates the relation between heavy borrowed capital and the company's net shareholders' equity.

Gross operating result (Ebitda) and the **net Financial Position**, as described above, are measures taken by the Group Management to monitor and assess the operating trend of the group itself and are not identified as an accounting measure within the IAS/IFRS; therefore, they should not be considered an alternative measure for the assessment of the course of the Group's result.

As the composition of these measures is not regulated by the accounting standards of reference, the criteria for determination applied by the Group may not be in line with that adopted by others and therefore may not be comparable.

Principal risks and uncertainties

Risks and uncertainties
Risk management (internal and external, social, industrial, political, financial) is integrated in the Group's development strategy and represents an essential element in the continuing evolution process of the governance system. Through the improvement of the rules of behaviour, respect for the environment, safeguard of stakeholders (employees, customers, suppliers, shareholders) risk management aims to safeguard the company's wealth.

Risks connected to general economic context and to that of the sector
The crisis which has progressively deteriorated the international financial and economic situation in 2008 and 2009 has represented an element of risk for the Group. The current economic weakness in the Eurozone countries, particularly Germany, is producing uncertainty regarding the possible evolution of economic activities in this area.

Financial risks
In the course of 2013 the financial market has maintained a situation of tension from the point of view of liquidity whereas the spreads applied by banks have slightly decreased.

The Group's Financial Management attends to the procurement of sources of funding and to the management of interest rates, exchange rates and counterpart risks, for all the companies included in the consolidation area. The Group uses derivative financial instruments to reduce risks deriving from fluctuations in interest rates and exchange rates in relation to the nature of the debt and to the international activity. A detailed examination of this type of risk is to be found in the explanatory notes, note 36 of the consolidated financial statements and note 32 of the company financial statements.

Legal risks
An update on the principal disputes in progress is contained in the specific sections of this report with further details in the explanatory notes. The estimates and the evaluations used derive from available information and are in any case subject to systematic revisions and any changes are immediately accounted for in the financial statements.

Insurance contracts
In the interest of all the Group subsidiaries insurance policies have been taken out with primary insurance companies to cover possible risks on persons and property, in addition to risks of civil liability towards third parties. All policies have been negotiated as part of a framework agreement to ensure a balance between the probabilities of risk occurring and the resulting damage for each one of the subsidiaries.

Breakdown of revenue according to geographic areas

The following tables provide figures on income and information on some of the activities related to the Group's geographic areas for the financial years ended 31 December 2013 and 2012.

2013	Europe	North America	Others	Total
Consolidated Revenues	88,144	15,231	17,797	121,172
Parent's Revenues	50,716	6,245	5,549	62,510

2012	Europe	North America	Others	Total
Consolidated Revenues	90,853	13,501	14,734	119,088
Parent's Revenues	51,459	5,992	4,875	62,326

It should also be noted that the trend in revenue does not follow any particular seasonal pattern.

Events after 31 December 2013

No significant events have occurred since that date.

Absence of control and coordination activity

Despite the fact that article 2497-sexies of the Civil Code states that 'unless proven to the contrary it is presumed that the management and coordination activity of companies is exercised by the company or the body bound in duty to consolidate the financial statements or in any case controlling them in accordance with article 2359', Bolzoni S.p.A. believes it operates in conditions of corporate and managerial autonomy with respect to its parent Penta Holding S.p.A. In particular and for illustrative yet incomplete purposes, the Issuer autonomously manages the treasury and business relations with its customers and suppliers and does not make use of any service given by its parent.

Relations with Bolzoni S.p.A. are limited to normal exercise of administrative and equity rights of the parent, typical of its shareholder status.

Corporate Governance

Preliminary remarks

In compliance with mandatory requirements, each year a Report on Corporate Governance is drawn up which, in addition to providing a general description of the corporate governance system adopted by the Group, also gives information on the ownership and on the compliance to the corporate governance code and resulting obligations. The above-mentioned Report, available for consultation in the section 'Investor Relations - Corporate Governance' of the web-site www.bolzoni-auramo.com, is made up of 18 chapters.

Below is a brief description of the most important aspects for the purposes of the present Management report.

Board of Directors

In accordance with the company by-laws, the Board of Directors is made up a number of members varying from a minimum of five to a maximum of fifteen. The Shareholders' Assembly held on 27 April 2012 established the number of Board members in eleven and the terms of office of the Board expire on the date of the Shareholders' Assembly convening for the approval of the Financial statements at 31.12.2014.

On 29 November 2010 the Board defined the procedure for operations performed with related parties by which it has reserved itself the right to a previous examination and approval of transactions having major economic and financial significance and of the most important transactions with related parties and has also decided to subject all operations with related parties to special measures of substantial and formal fairness. The powers therefore given to the executive directors do not include decisions regarding important operations, meaning those which, due to their very nature, subject the Company to the need to inform the market in accordance with the specific provisions established by the Supervisory Authorities. When it becomes necessary for the Company to perform significant transactions, reasonably ahead of time the delegated bodies must provide the Board of Directors with a description summarizing the performed analyses in terms of strategic coherence, economic feasibility and expected return for the Company. Decisions regarding the most important transactions with related parties are also excluded from the powers given to the executive directors as these are all subject to special measures of substantial and formal fairness and to disclosure to the Board.

In accordance with article 25-*bis* of the By-Laws and prior to the opinion of the Board of Statutory Auditors, the Board of Directors nominates the manager responsible for the preparation of the company accounting documents, and grants the related functions even to more than one person as long as they perform jointly and in agreement; anyone with a long-term experience in administrative and financial matters in companies of an significant dimension can be nominated. To implement this statutory provision the Board of Directors, in the meeting held on 27 April 2007, nominated the manager responsible for the preparation of the company's accounting documents.

A suitable number of independent directors represents an essential element for protecting the interests of shareholders, in particular the minority shareholders, and third parties. With this in mind and convinced that the adoption of a high degree of security systems protecting against potential conflict of interest, is a priority interest for the Company, particularly in those areas less safeguarded

by the Shareholders' Assembly, the Board of Directors proposed to the Shareholders' Assembly on 21 April 2009, three members of the Board of Directors with the necessary independency characteristics together with the selective criteria for their verification.

The independency requisites of the directors are verified each year and cover the non-existence or the irrelevance, extended to the last three year period, of economic relations, of interests or of other nature, held directly, indirectly or on behalf of third parties, with the Company, its managing directors and managers with strategic responsibilities, its parent companies or subsidiaries or with subjects in any case correlated with the Company. The result of these verifications is included in the Report on Corporate Governance.

Committees created by the Board of Directors

The Board of Directors has created the Control and Risk Committee which, among other things, has the task of selecting and proposing candidates for the office of directors and appointing the Remuneration Committee.

Internal Control System

In view of the approval by the Company of the Organisation Model in accordance with Leg. Decree n° 231/2001 the elements forming the Control and Risk System are given by the person responsible for the Control and Risk system, appointed in accordance with TUF, as well as by the functioning of the Control and Risk Committee described above, and by the Corporate Charter of Values existing since 2003. This document identifies the values in which the Company and the entire Group identify themselves, with particular focus on sustainable social development and protection of working conditions, with regards both to safety and to preventing exploitation of workers and child labour.

It should also be noted that in 2008 the Company completed the project for the preparation and the implementation of an Organisation Model in accordance with Leg. Decree 231/01, which was presented to the approval of the Board of Directors on 26 March 2008. Together with the Organisation Model the Board of Directors were also presented with the Ethical Code for approval which constitutes the evolution and the update of the Company's Charter of Values, with the explicit acknowledgement of ethical values already typical of the behaviour of both the Company and the entire Group.

Once implemented, the Organisation Model was accompanied by the appointment of a collegial Compliance Committee, which conducts its own activities in order to constantly verify that the Organisation Model is adequate and effective for the prevention of so called 'presumable crimes' as identified by the Legislator from time to time. During the financial year the Organisation Model has been updated to include new crimes pursuant to Leg.Decree 231/01, as indicated in the Corporate Governance Report.

It should also be noted that a significant supervision of the internal control system is also provided by the running procedures and protocols prepared for obtaining the Social Accountability Certification given in accordance with SA800 regulations as well as by the administrative and accounting procedures applied by the manager responsible for the preparation of the company's accounting documents.

Board of Statutory Auditors

The Board is made up of three permanent auditors and two alternate auditors who, in accordance with art. 22 of the company by-laws, must all necessarily be registered as Certified Accounting Auditors and must have performed the activity of legal control of the accounts for a period of not less than three years. Furthermore, they can take on other administrative and control assignments within the limits established by the rules.

Following the resolutions passed on 29 April 2013 by the Shareholders' Assembly, the Board of Statutory Auditors is made up of the Chairman Giorgio Picone and the permanent auditors Carlo Baldi and Maria Gabriella Anelli . Their office expires on the date of the Shareholders Assembly convened for the approval of the Financial statements for year 2015. The Board of Statutory Auditors does not hold any other office in other Group companies. A complete disclosure will be attached to the Report of the Statutory Board of Auditors on Bolzoni S.p.A.'s Financial statements for 2013, in compliance with the current rules.

Stakes held by the components of the administrative and control bodies, by the general directors and managers with strategic responsibilities (Art. 79 of Consob Ruling Resolution n° 11971 passed on 14.5.1999)

The Board of Directors' proposal to the Shareholders

Gentlemen,

We conclude our report by inviting you to approve the financial statements we have prepared and to give your consent regarding the criteria adopted.

We therefore propose:

- the approval of the financial statements at 31.12.2013;
- the allocation of the amount of 52,628.48 euros to legal reserve;
- the distribution of dividends for the amount of 909,787.03 euros;
- the allocation of the remaining profit of 90,154.19 euros to extraordinary reserve.

Our sincere thanks go to the Shareholders for the trust demonstrated and to all our collaborators for their valuable assistance.

Podenzano, 13 March 2014

The Board of Directors

BOLZONI
The Material Handling Group

* Following the application as of 1 January 2013 (retrospectively) of the amendment to IAS 19, the figures at 31 December 2013 presented for comparative purposes have been revised as established by IAS 1. For further details please see paragraph “Accounting principles”.

** Under net variation of trade payables, the cash flow statement also considers the 50 thousand euros variation in unpaid investments in tangible assets

*** Except variations in bank overdrafts and advance trade payments, included in net liquid funds.

ACCOUNTING PRINCIPLES AND EXPLANATORY NOTES

1. Corporate information

Bolzoni S.p.A. is a limited company incorporated under Italian law, domiciled in Podenzano (PC), località "I Casoni".

The main object of the activity of Bolzoni S.p.A. and the companies it controls (hereinafter jointly called "the Bolzoni Group" or "the Group") is to be found in the production and marketing of attachments for fork lift trucks.

The consolidated financial statements of Bolzoni S.p.A. (the Company or the Parent) for the year ended 31 December 2013 were approved by the Board of Directors on 13th March 2014.

As at December 31, 2013 the majority of Bolzoni S.p.A.'s share capital is owned by Penta Holding S.p.A. with registered offices in Podenzano, Località I Casoni (Piacenza) which acts as a holding of industrial investments.

The Parent Company is not subject to management and coordinating activities on behalf of companies or bodies and establishes in full autonomy its general and operational strategic orientations.

2.1 Preparation basis

The consolidated financial statements for 2013 have been prepared in compliance with the International Accounting Standards (IAS/IFRS) issued by the International Accounting Standard Board (IASB) and approved by the European Commission.

The accounting principles used in this financial statements are those formally approved by the European Union and in force at 31 December 2013. Unless otherwise indicated, figures contained in the statements and notes are in thousands of euros.

We have included all the specific disclosure requirements established in CONSOB's resolution n° 15519 passed on July 27, 2006, CONSOB's resolution n° 155 20 passed on July 27 2006 and in Release n° DEM/6064293 dated 28.07.2006.

The financial statements as at 31 December 2013 have been drawn up on the basis of the historic cost, modified as required by the accounting standards of reference for the evaluation of certain financial instruments, if necessary.

With reference to the Statements of the Consolidated Financial report, the following should be noted:

- Balance Sheet: the Group differentiates between non-current assets and liabilities and current assets and liabilities;
- Income Statement: the Group presents a classification of costs according to their nature, which is believed to be more representative of the Group's predominantly commercial and distribution activities;
- Cash Flow Statement: it has been drawn up using the indirect method to determine cash flows produced by the activity during the period;
- Changes Equity: the Group includes all variations to net equity including those deriving from transactions with shareholders (distribution of dividends, share capital increases)

The consolidated financial statements at 31 December 2013 have been prepared on the going concern assumption. Indeed the Group has assessed that, despite a difficult economic and financial context, no material uncertainties exist regarding its going concern, also considering the actions already taken in the previous financial years to adjust to the altered levels of demand, the Group's industrial and financial flexibility, the availability of lines of credit from banks, the growth in turnover volumes during the financial year 2013 with respect to 2012 and 2011, the cash flow generated by the operating activity, in addition to the economic and financial forecasts included in the multi-year business plan approved by the Board of Directors for the period 2014-2017.

IFRS accounting standards, amendments and interpretations applied from January 2013

- On May 12, 2011, the IASB issued IFRS 13 – Fair value measurement, clarifying the determination of the fair value for the purpose of the financial statements and applying to all situations in which IFRS permit or require a fair value measurement or the presentation of disclosures based on fair value, with some limited exceptions. In addition, this standard requires more detailed information to be disclosed on fair value measurement (fair value hierarchy) compared to IFRS 7 requirements. The standard has been effective prospectively since January 1, 2013. The adoption of this principle had no impact.
- On June 16, 2011, the IASB issued an amendment to IAS 19 – Employee benefits that eliminates the option to defer the recognition of gains and losses, known as the "corridor method", and requires all actuarial gains and losses to be booked to "Other comprehensive income" immediately, so that the full net amount of the provisions for the defined benefits (net of plan assets) is recognised in the consolidated financial position. The amendment further requires any changes in the defined benefit provision and plan assets over the previous period to be subdivided into three components: the cost components of work performed during the reporting period must be recognised in the Income Statement as service costs; net interest costs calculated by applying the appropriate discount rate to the opening net balance of defined benefit provision net of assets must be booked to Income Statement as net financial expenses and the actuarial gains and losses resulting from the re-measurement of assets and liabilities must be booked to "Other comprehensive income". In addition, the return on assets included in net interest costs must be calculated using the discount rate applicable to liabilities and no longer the expected return on the assets. The amendment also introduces the requirement for supplementary disclosures to be provided in the notes. The amendment is applicable retrospectively from financial periods beginning on or after January 1, 2013.
  The effects of the adoption of the new principle on the financial statements is a positive effect on Net Income for Euro 150 thousand after tax (Euro 206 thousand pre-tax) due to actuarial losses booked in Income Statement 2012 that have been recognised in "Other comprehensive income".
- On June 16, 2011, the IASB issued an amendment to IAS 1 – Presentation of Financial Statements requiring entities to group all items presented in "Other comprehensive income" depending on whether they can be reclassified to the Income Statement. The amendment is applicable from financial periods beginning on or after July 1, 2012. The amendment implementation required a new layout of "Other comprehensive income".
- On December 16, 2011, IASB issued certain amendments to IFRS 7 – Financial instruments: Disclosures. The amendments require information about the effect or potential effect of offsetting financial assets and liabilities on an entity's financial position. These amendments are to be applied retrospectively for periods beginning on or after January 1, 2013. The required disclosures should be provided retrospectively. The adoption of these amendments has had no effect on these Group consolidated financial statements.
- On May 17, 2012 the IASB published document Annual Improvements to IFRSs: 2009-2011 Cycle, amending standards as part of the annual improvement process, which is designed to make necessary, but not urgent, amendments to IFRSs. Outlined below are those amendments that impact the presentation, recognition and measurement of the items of the financial statements. Those related to changes in new terminology having minimal accounting impacts, or those that concern standards or interpretations not applicable to the Group have been omitted.
  - IAS 1 Presentation of Financial Statements – Comparative information: Clarifies that any additional comparative information provided must be presented in accordance with IAS/IFRS. It also clarifies that when an entity changes an accounting principle or makes adjustments/restatements retrospectively, it must include an opening statement of financial position at the beginning of the comparative period ("third statements of financial position" in the financial statements); related disclosures are not required for such "third statements of financial position", except for the affected items, in the supporting notes.
  - IAS 16 Property, Plant and Equipment – Classification of servicing equipment: clarifies that servicing equipment must be classified under Property, plant and equipment if used during more than one accounting period. Otherwise, they must be classified as inventory.

- IAS 32 Financial Instruments: Presentation – Taxes relating to distributions to holders of an equity instrument and transaction costs on equity transaction: clarifies that such income taxes are accounted according to IAS 12.
- IAS 34 Interim Financial Reporting – Total assets for a reportable segment: clarifies that total assets must be disclosed only if such information is regularly provided to the chief operating decision maker of the entity and there has been a material change from the amounts disclosed in the last annual financial statements for the reportable segment.

The proposed amendments are effective for the years beginning on or after January 1, 2013. Early adoption is allowed. The adoption of these amendments has had no effect on measurements and had limited effect in terms of disclosures on the consolidated financial statements of the Group.

IFRS and IFRIC accounting standards, amendments and interpretations approved by the European Union but not yet applicable and not early adopted by the Group

- On May 12, 2011, IASB issued IFRS 10 – Consolidated Financial Statements that is to supersede SIC-12 Consolidation – Special Purpose Entities (Special Purpose Vehicles) and parts of IAS 27 – Consolidated and Separate Financial Statements, which will be renamed Group Consolidated financial statements and will establish how equity investments are to be accounted for in the Group consolidated financial statements. The key changes introduced by this new principle are as follows:
  - Under IFRS 10, all types of entities are to be consolidated according to a single basic principle, i.e. the principle of control. The changes introduced remove the perceived inconsistency between the former IAS 27 (based on control) and SIC 12 (based on the transfer of risk and benefits);
  - A more detailed definition of control has been introduced, based on three elements: (a) power over the investee; (b) exposure, or rights, to variable returns from the investor's involvement with the investee; (c) ability on the part of the investor to use its power over the investee to affect the amount of the investor's returns;
  - for the purpose of determining whether an investor has control over an investee, IFRS 10 requires investor to focus on the activities that significantly affect the investee's return;
  - for the purpose of determining whether an investor has control over an investee, IFRS 10 requires that only substantive rights be considered, i.e. those rights that can be exercised when significant decisions need to be taken concerning the investee;
  - IFRS 10 provides application guidance on evaluating whether control exists in complex situations, such as *de facto* control, potential voting rights, situations in which it is necessary to assess whether the decision-maker is acting as a principal or an agent, etc.

Generally speaking, IFRS 10 application requires significant insight on a certain number of application issues.
This standard is to be applied retrospectively from January 1, 2014. The adoption of this new principle will have no impact on the scope of consolidation of the Group.

- On May 12, 2011, IASB issued IFRS 11 – Joint Arrangements that is to replace IAS 31 – Interests in Joint Ventures and SIC-13 Jointly-controlled Entities – Non-monetary Contributions by Venturers. Without prejudice to the criteria for determining joint control, the new standard provides criteria for the accounting of joint arrangements that focus on the rights and obligations of the arrangement, rather than its legal form and requires a single method to account for interests in jointly-controlled entities in consolidated financial statements, the equity method. According to IFRS 11, the existence of a separate vehicle alone is not sufficient to classify a joint arrangement as a joint venture. This new standard is to be applied retrospectively from January 1, 2014. After this standard was issued, IAS 28 – Investments in Associates was amended to include interests in joint ventures in its scope of application, as of the effective date of the new standard. The adoption of this new principle will have no impact on consolidated financial statements of the Group.
- On May 12, 2011, IASB issued IFRS 12 – Disclosure of interests in other entities, a new standard that includes all of the disclosure requirements for subsidiaries, joint arrangements, associates, special purpose entities and other non-consolidated special purpose vehicles to be stated in the consolidated financial statements. This standard is to be applied retrospectively from January 1, 2014.
- On December 16, 2011, the IASB issued certain amendments to IAS 32 – Financial Instruments: Presentation to clarify the application of certain offsetting criteria for financial assets and financial liabilities in IAS 32. These amendments are to be applied retrospectively for periods beginning on or after January 1, 2014.

- On June 28, 2012, IASB published document *Consolidated Financial Statements, Joint Arrangements, and Disclosure of Interests in Other Entities: Transition Guidance (Amendments to IFRS 10, IFRS 11 and IFRS 12)*. The purpose of this document is to clarify the transition rules in IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements and IFRS 12 Disclosure of Interests in Other Entities. These amendments are to be applied - along with the reference standards - for years beginning on January 1, 2014, unless adopted earlier.
- The amendments to IFRS 10, IFRS 12 and IAS 27 "Investment Entities" issued on October 31, 2012 introduce an exemption from the consolidation of subsidiaries for investment entities, unless the investees provide them with services related to their investment activities. Under these amendments, an investment entity must measure its investment in subsidiaries on a fair value basis. In order to qualify as investment entity, an entity must:
  - obtain funds from one or more investors for the purpose of providing them with professional investment management services;
  - commit to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both;
  - measure and evaluate the performance of substantially all of its investments on a fair value basis.

  These amendments are to be applied - along with the reference standards - for years beginning on January 1, 2014, unless adopted earlier. The adoption of this new principle will have no impact on consolidated financial statements of the Group.
- On May 29, 2013, the IASB issued some amendments to IAS 36 Impairment of Assets – Recoverable amount disclosures for non-financial assets. These amendments clarify that the additional disclosures on the recoverable amount of assets (including goodwill) or cash-generating units when such recoverable amount is based on fair value less costs of disposal, are only required for those assets for which an impairment loss was recognised or reversed during the reporting period. These amendments are to be applied retrospectively for financial periods beginning on January 1, 2014.
- On June 27, 2013, the IASB issued some amendments to IAS 39 "Financial instruments: Recognition and measurement – Novation of derivatives and continuation of hedge accounting". These amendments introduce certain exceptions to the hedge accounting requirements in IAS 39 applicable when an existing derivative is required to be replaced with a new derivative for laws or regulations mandate clearing, either directly or indirectly, through a central counterparty (CCP). These amendments are to be applied retrospectively for financial periods beginning on January 1, 2014. Early adoption is allowed.

IFRS accounting standards, amendments and interpretations not yet endorsed by the European Union.

The European Union has not yet completed its endorsement process for the standards and amendments below reported at the date of these financial statements.

- On May 20, 2013, IFRIC interpretation 21 – Levies was issued. The interpretation clarifies when a liability for levies imposed by government agencies should be recognised, both for levies that are accounted for in accordance with IAS 37 – Provisions, Contingent Liabilities and Contingent Assets, and those for which the settlement timing and amount are certain.
- On November 12, 2009, the IASB issued IFRS 9 – Financial instruments: the same standard was amended on October 28, 2010. The standard, applicable retrospectively from January 1, 2015, represents the first part of a process in stages, the aim of which is to entirely replace IAS 39, and introduces new requirements for the classification and measurement of financial assets and financial liabilities. In particular, as regards financial assets, the new standard adopts a single approach based on how an entity manages its financial instruments and the contractual cash flows characteristics of the financial assets, in order to determine its valuation criteria and replacing the many different rules in IAS 39. The most significant effect of the standard regarding the financial liabilities relates to the accounting for changes in fair value attributable to changes in the credit risk of financial liabilities designated as at fair value through profit or loss. According to the new standard, these changes must be recognised in "Other Comprehensive Income" and will no longer be recognised in the Income Statement.
- On November 19, 2013, IASB published document "*IFRS 9 Financial Instruments - Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39*" concerning the new hedge accounting model. The document aims at responding to some criticisms made to IAS 39 requirements for hedge accounting, which are often considered as too stringent and not suitable for reflecting the entities' risk management policies. The main new features are the following:

- changes to the types of transactions eligible for hedge accounting, namely extending the risks for non-financial assets/liabilities eligible for hedge accounting;
- change in the way forward contracts and options are recognised when they are included in a hedge accounting transaction in order to decrease Income Statement volatility;
- changes to effectiveness test by replacing the current method based on 80-125% range with the principle of the “economic relationship” between hedged item and hedging instrument. Moreover, no retrospective effectiveness test of the hedging relationship is required any more;
- the increased flexibility of the new accounting rules is offset by additional disclosure required on the company risk management activities.

- On December 12, 2013, the IASB issued a set of amendments to IFRSs (“Annual Improvements to IFRSs 2010 - 2012 Cycle” and “Annual Improvements to IFRSs 2011 - 2013 Cycle”); set out below are those applicable to the Company that lead to changes in the presentation, recognition or measurement of financial statements items, excluding those that only regard changes in terminology having a limited accounting effect:
  - IFRS 2 – *Share-based Payment*: the amendment clarifies the definition of 'vesting conditions' in IFRS 2 by separately defining a ‘performance condition’ and a ‘service condition’.
  - IFRS 3 – *Business Combinations*: the amendment clarifies that contingent consideration that is a financial asset or financial liability can only be measured at fair value, with changes in fair value being presented in either profit or loss or other comprehensive income depending on the requirements of IAS 39 (or IFRS 9).

  - IFRS 8 – *Operating Segments- Aggregation of operating segments*: the amendment requires entities to disclose judgements made by management for operating segments identification criteria, including a description of aggregated operating segments and economic indicators considered in determining if such operating segments have “similar economic characteristics”.

  - IFRS 8 - *Operating segments – Reconciliation of total of the reportable segments’ assets to the entity’s assets*. : the amendment requires that reconciliation of total of the reportable segments’ assets and total of company assets have to be disclosed only if total of the reportable segment’s assets are regularly reviewed by the chief operating decision maker.

  - IFRS 13 – *Fair Value Measurement – Short-term receivables and payables*. Only Basis for conclusions have been modified, clarifying that issuing IFRS 13 and amending IFRS 9 and IAS 39 did not remove the ability to account for current receivables and payables without discounted effects, when impact are not significant.

  - IAS 16 *Property, plant and equipment and IAS 38 Intangible Assets – Revaluation method: proportionate restatement of accumulated depreciation/amortization.*: amendments have eliminated the inconsistencies in determining accumulated depreciation when *Property, plant and equipment* or *Intangible asset*s are revalued. New standards clarify that gross carrying amount was revaluated and the accumulated depreciation/amortization is calculated as the difference between the gross and the net carrying amounts.

  - IAS 24 – *Related Party Disclosures*: the amendment clarifies that an entity providing Key Management Personnel services to the reporting entity is a related party of the reporting entity.

The amendments above are effective for annual periods beginning on or after July 1, 2014, with early application permitted.

On December 12, 2013, the IASB issued a set of amendments to IFRSs ("Annual Improvements to IFRSs 2011 - 2013 Cycle" amending standards as part of the annual process of improvement. The main amendments include:

- IFRS 1 First-time Adoption of International Financial Reporting Standards – Meaning of "effective IFRS". It has been clarified that an IFRS first time adopter entity, as an alternative to the application of a principle currently in force on the date of the first IAS/IFRS financial statements, may opt for early adoption of a new standard intended to replace the principle in force. The option is allowed when the new standard permits early application. It also needs to be applied to the same version of the principle in all periods presented in the first IAS / IFRS financial statements.

- IFRS 3 – *Business Combinations- Scope exception for joint ventures*: the amendment clarifies that paragraph 2(a) of IFRS 3 excludes the formation of all types of joint arrangements as defined in IFRS 11 - Joint Arrangements from the scope of IFRS 3.

- IFRS 13 – *Fair Value*: this amendment clarifies that the portfolio exception included in paragraph 52 of IFRS 13 for measuring the fair value of a group of financial assets and financial liabilities on a net basis applies to all contracts within the scope of IAS 39 or IFRS 9 regardless of whether they meet the definitions of financial assets or financial liabilities as defined in IAS 32.

- IAS 40 *Investment Properties – Interrelationship between IFRS 3 and IAS 40*. Amendments clarifies that IFRS 3 and IAS 40 are not mutually exclusive and that an entity acquiring an investment property should consider whether it meets the definition of a business as defined in IFRS 3 or IAS 40, it needs to consider specific requirements of IFRS 3 or IAS 40.

The amendments above are effective for annual periods beginning on or after July 1, 2014, with early application permitted.

2.2 Consolidation principles and consolidation area

The consolidated financial statements comprise the financial statements of Bolzoni S.p.A. and its subsidiaries at 31 December of each year. The financial statements of the subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies. The closing date of subsidiary financial statements is the same as that of the parent.

In preparing the consolidated financial statements the assets, the liabilities, as well as the total amounts of costs and revenue of the consolidated companies are acquired line by line and the portion of equity and the year's result belonging to minority interests is attributed to the specific caption of the Income Statement and Balance Sheet. This consolidation method (integral consolidation) is only valid for the subsidiary companies whereas for the associated companies the equity method is used. There are however no Joint Ventures.

The accounting value of the investment in each of the subsidiaries is eliminated against the corresponding equity portion of each of the subsidiaries inclusive of possible adjustments to fair value of the related assets and liabilities, at the date of acquisition; any residual difference that may emerge is allocated to the goodwill caption. Investments in associated companies are accounted for using the equity method.

Below is the list of the group companies at 31 December 2013:

Name	Location	Share capital (thousands of currency)	% of direct ownership	% of indirect ownership
Bolzoni Auramo Incorporated	Homewood – Illinois - USA	US $ 500	100 %	
Bolzoni Limited	Warrington - UK	GBP 980	100 %	
Bolzoni Auramo Polska Sp Zoo	Lublin - Poland	PLN 350	60 %	
Bolzoni Auramo S.L.	Barcellona - Spain	€ 200	100 %	
Bolzoni Auramo Sud S.r.l.	Bisceglie - Bari Italy	€ 50	100 %	
Bolzoni S.A.R.L.	Forbach – France	€ 198	100 %	
Auramo Oy	Vantaa – Finland	€ 565	100 %	
Bolzoni Auramo BV	Helmond - Netherlands	€ 18	51 %	
Bolzoni Auramo Australia PTY Ltd	Dudley Park SA - Australia	AUD 3,264	100 %	
Eurolift Pty Ltd	Dudley Park SA – Australia	AUD 300		100%(***)
Bolzoni Auramo Ltd.	Dollard des Ormeaux - Canada	CAD $ 856	100 %	
Bolzoni Auramo GmbH	Korschenbroich – Germany	€ 1,000	100 %	
Bolzoni Italia S.r.l.	Prato - Italy	€ 50	100 %	
Bolzoni Auramo AB	Gavle - Sweden	SEK 100	100 %	
Bolzoni Auramo Shanghai	Minhang District - China	RMB 11,576	60 %	
Bolzoni Holding Hong Kong	Hong Kong	HK$ 112,608	80%	
Xin Huaxin China (*)	Longhua - China	RMB 43,750		20% (**)
Bolzoni Huaxin China	Longhua - China	RMB 30,000		60%(**)
Bolzoni Auramo Wuxi	Wuxi - China	RMB 62,883		100%(**)
Auramo South Africa (*)	Benoni – South Africa	ZAR 100		40 %(****)
Hans H. Meyer GmbH	Salzgitter – Germany	€ 1,023	100 %	
LLC "Hans H. Meyer OOO"	Moscow - Russia	RUB 1,025		80%

(*) = Associated companies assessed using the N.E. method
(**) = Percentage ownership by Bolzoni Holding Hong Kong
(***) = Percentage ownership by Bolzoni Auramo Australia PTY Ltd
(****) = Percentage ownership by Auramo OY

During financial year 2013 no variations into consolidation area have been recorded. It should only be noted that Meyer Sarl has merged by incorporation with Bolzoni Sarl (previously Bolzoni Auramo Sarl) and that the closing down of Meyer Ltd has been completed.

All the intra-group balances and transactions, including any possible profits and losses not achieved and resulting from intra-group transactions that are recognized in assets, are fully eliminated.

2.3 Significant accounting judgements and estimations

Untaxed reserves in the equity of the subsidiaries

Various Group companies have untaxed reserves of equity. By virtue of the Group's policy encouraging the homogenous strengthening of the subsidiaries wealth with respect to the evolution of business, dividends are not normally paid out to the parent company. Therefore, in compliance with IAS 12, no deferred tax has been calculated with respect to these reserves.

Judgements and accounting estimations

In accordance with IAS/IFRS principles, the preparation of the financial statements requires estimates and assumptions on behalf of the management which have an effect on the value of assets and liabilities and on their disclosure at the date of the statement. The actual results could however differ from these estimates. The estimates are used for measuring depreciation, write-downs investments and inventory, benefits to employees, taxes and accrual to provisions for contingencies and risks.

Estimations of the Provision for Doubtful Debt are based on the losses expected by the Group. If the current economic and financial crisis were to protract or worsen this could possibly deteriorate the financial conditions of the Group's debtors more than has been estimated in these financial statements.

Estimates and assumptions are reviewed from time to time and the effects of each variation can be seen in the Income Statement in the period in which the review is performed.

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Impairment of Goodwill

At least on an annual basis, goodwill is checked for any possible impairment; this requires an estimation of the value in use of the cash-generating units to which goodwill is allocated, in turn based on the estimation of the current value of the expected cash flows from the cash-generating unit and their discounting on the basis of a suitable discount rate. The carrying amount of goodwill at 31 December 2013 was 10.618 thousand euro (2013: 10.618 thousand euros). More details are given in Note 5.

Amortization and depreciation (for assets with definite useful life)

In order to calculate amortization and depreciation the remaining useful life is periodically reviewed.

2.4 Summary of principal accounting policies

Foreign currency translation

The consolidated financial statements are presented in thousands of euros, which is the Company's functional and presentation currency. Each entity in the group determines its own functional currency and the items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currency are initially recorded at the exchange rate (of the functional currency) on the transaction date. Monetary assets and liabilities denominated in foreign currencies, are retranslated to the functional currency at the exchange rate in force at the balance sheet date. All exchange rate differences are taken to profit or loss. Non-monetary items measured in terms of historic cost in a foreign currency are translated using the exchange rates in force at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date the fair value was determined.

The subsidiaries using an operating currency other than the euro are as follows:

Bolzoni Auramo Inc.	US Dollar
Bolzoni Auramo Canada	Canadian Dollar
Bolzoni Ltd	Pound Sterling
Bolzoni Auramo AB	Swedish Crown
Bolzoni Auramo Pty Ltd /Eurolift Pty Ltd	Australian Dollar
Bolzoni Auramo Sp Zoo	Polish Zloty
Bolzoni Auramo Shanghai	Chinese Renminbi (Yuan)
Bolzoni Auramo Wuxi	Chinese Renminbi (Yuan)
Bolzoni Huaxin	Chinese Renminbi (Yuan)
Bolzoni Holding Hong Kong	Hong Kong Dollar
LLC "Hans H. Meyer OOO"	Russian Ruble

As at the reporting date, the assets and liabilities of these subsidiaries are translated into euros at the exchange rate ruling on that day and their income statements are translated using the average exchange rates for the year. The exchange rate differences arising from the translation are taken directly to a separate component of net equity. On possible disposal of a foreign company, the cumulative exchange rate differences, taken to net equity on the basis of that particular foreign company, are recognized in the income statement.

Property, plant and equipment

Property, plant and equipment are stated at historic cost, net of accumulated depreciation and accumulated impairment. Such cost includes costs for replacing part of plant and equipment when that cost is incurred if the recognition criteria are met. Depreciation is calculated on a straight-line basis over the expected useful life of the assets generally attributed to the various categories of assets.

Depreciation, which begins when the assets are available for use, is calculated on a straight-line basis over the expected useful life of the assets and taking into account their residual value. The depreciation rates used, which reflect the useful life generally attributed to the various categories of assets, and which have remained unchanged with respect to the previous financial year, are the following:

Buildings and light constructions	3 %
Plants and equipment	from 10 to 15.5%
Industrial and commercial equipment	from 25% to 30%
Other assets	from 10% to 25%

Land, which normally has an unlimited useful life, is not subject to depreciation.

The carrying amount of property, plant and equipment is reviewed for possible impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable, according to the established depreciation plan. If an indication of this type exists and in the event that the carrying amount exceeds the expected realizable value, the assets or the cash-generating units to which the assets have been allocated are revalued until they actually reflect their realizable value.

The residual value of the asset, the useful life and the methods applied are reviewed annually and adjusted if necessary at the end of each financial year.

A tangible asset is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) are included in the income statement in the year the asset is derecognized.

Leases

Finance leases, which substantially transfer to the Group all the risks and rewards connected to the ownership of the leased item, are capitalized among property, plant and equipment at the inception of the lease, at the fair value of the leased item or, if lower, at the present value of the minimum lease payments. A debt of the same amount is booked in liabilities and is progressively reduced according to the plan for refunding the principal amounts included in the installments.

Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income. The assets are depreciated according to and at the rates indicated in the previous paragraph.

The lease contracts where the lessor substantially retains all the risks and benefits typical of ownership are classified as operating leases.

The initial negotiation costs for the operating lease contracts are considered as increasing the cost of the leased asset and are measured over the lease term so that they balance the income generated by the same lease.

Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term.

Business combinations and goodwill

Business combinations are recorded using the purchase method. This requires the fair value recognition of the identifiable assets (including previously unrecognized intangible assets) and the identifiable liabilities (including potential liabilities and excluding future restructuring) of the acquired company.

Goodwill accounted for in a business combination is represented by the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities and is classified as an intangible asset. The possible negative difference ("negative goodwill") is recognized in the income statement at the moment of acquisition. Following initial recognition, goodwill is decreased by any accumulated impairment losses. Goodwill is reviewed annually for impairment, or more frequently if events or changes in circumstances indicate that the carrying amount may be impaired. The impairment procedure is approved by the Directors independently and prior to the approval of the financial reports. For further details regarding the criteria applied for impairment testing see note on "Impairment of non-financial fixed assets".

Intangible assets

Acquired intangible assets are recognized as assets, according to the contents of IAS 38 (Intangible Assets) when it is probable that the use of the asset will generate future economic benefits and when the cost of the asset can be reliably determined.
Intangible assets acquired separately are measured on initial recognition at cost, whereas those acquired in a business combination are measured at fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is charged against profits in the year in which the expenditure is incurred. The useful lives of intangibles assets are assessed to be either definite or indefinite. Intangible assets with definite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization methods for an intangible asset with a definite useful life is reviewed at least at each year end or even more frequently if necessary. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with definite lives is recognized in the income statement in the expense category consistent with the function of the intangible asset.
The Group has not recognized any intangible assets with indefinite lives in the balance sheet.

Research and development costs

Research costs are expensed as incurred. Development costs arising from a particular project are capitalized only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of technical, financial or other types of resources to complete development and its capacity to reliably measure the expenditure during the development of the asset and the existence of a market for the products and services resulting from the activity or of their use for internal purposes. The capitalized research costs include only those expenses sustained that can be directly attributed to the development process. Following the initial recognition, the development costs are measured at the cost less any accumulated amortization or loss. Any capitalized costs are amortised over the period in which the project is expected to generate income for the Group.

The carrying amount of development costs is reviewed for impairment annually, when the asset is not yet in use, or more frequently when an indication of impairment arises during the reporting year.

Following is an overview of the policies applied by the Group to intangibles assets :

	Licences, Trademarks & Patents	*Development costs*
Useful lives	Definite	Definite
Method used	Licences amortized over 3/5 years Patents and trademarks amortized over 10 years	Amortized over 5 years, on a straight-line basis, corresponding to the period of expected future sales from the related project
Internally generated or acquired	Acquired	Internally generated
Impairment testing/tests on recoverable amounts	Annually and more frequently when an indication of impairment exists.	Annually or more frequently when an indication of impairment exists.

Gains or losses deriving from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the income statement when the asset is disposed of.

Investments in associates

The Group's investment in its associates is accounted for under the equity method. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint-venture.

Under the equity method, the investment in the associate is carried in the balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the associate. Goodwill related to an associate is included in the carrying amount of the investment and is not amortized. After application of the equity method, the Group determines whether it is necessary to recognize any additional impairment loss with respect to the Group's net investment in the associate. The income statement reflects the share of the results of operations of the associate. Where there has been a change recognized directly in the equity of the associate, the Group recognizes its share of any changes and discloses this, when applicable, in the statement of changes in equity.

The reporting dates of the associates and the Group are identical. The investment is assessed on the basis of the income and financial situation at 31 December. The accounting principles conform to those used by the Group.

Impairment of non-financial fixed assets

The Group assesses annually at each reporting date whether there is an indication that an asset (intangible assets, property, plant and equipment owned and finance leased assets) may be impaired. In making this assessment of the assets, both internal and external sources of information are considered. With regards to the former (internal sources) the following are considered: obsolescence or the physical deterioration of the asset; if, during the financial year there have been significant changes in the use of the asset; if the economic trend of the business appears to be worse than expected. With regards to external sources however the following are considered: if the market prices of the asset have significantly dropped; if there are particular technological, market or legislative issues capable of reducing the asset's value.

Regardless of whether there are internal or external indications of impairment loss, goodwill and the other possible intangible assets with indefinite useful life are subjected to impairment testing at least once a year.

In both cases (either the annual check of the carrying amount of goodwill or the other tangible and intangible assets with a definite useful life with indications of possible impairment loss) the Group makes an assessment of the recoverable amount. The recoverable amount is the higher between the fair value of an asset or cash-flow generating unit, net of selling costs, and the value in use; it is determined for each asset, except when the asset does not generate cash flows which are largely independent from those generated by other assets or groups of assets, in which case the Group assesses the recoverable amount of the cash-flow generating unit to which the asset belongs. In particular, as goodwill does not generate cash-flows independently from other assets or groups of assets, impairment testing involves the unit or the group of units to which goodwill has been allocated.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time-value of money and the risks specific to the asset.

For the assessment of value in use, the future financial flows are taken from the company business plans approved by Board of Directors independently and prior to the date of approval of the financial reports, and which form the best assessment that the Group can make of the expected economic conditions during the period covered by the plan. Projections usually cover a period of three years; the long-term growth rate used for assessing the terminal value of the asset or the unit is normally lower than the average, long-term growth rate of the segment, of the Country or of the benchmark market and, if appropriate, may correspond to zero or can even be negative. The future financial flows are assessed by using the current conditions as benchmark: therefore the estimations do not consider either the benefits arising from future re-organization in which the Group is not yet involved or future investments for improvement or optimization of the asset or unit.

Impairment loss to assets in function (being used) are taken to profit and loss in the cost categories consistent with the function of the asset showing the impairment loss.

At each reporting date the Group also assesses whether there are any indications that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously written-off impairment loss, excluding goodwill, may only be reversed if there have been changes in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In that case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

Such reversal is recognized in profit and loss unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining life. In no way the goodwill amount previously written-down can return to the original amount.

Financial assets

Financial assets are initially recognized at the cost – plus the additional charges at acquisition – representing the fair value of equivalent paid. After the initial recognition, financial assets are assessed in relation to their operating destination on the basis of the following outline.

Financial assets held for trading

These are financial assets acquired for the scope of obtaining a profit from short term price fluctuations. After initial recognition, these assets are measured at the fair value and the related profit or loss is charged to the income statement. The derivative financial instruments (interest rate swap, options, forward etc…) are classified as held for trading, unless designated as effective hedging instruments.

Financial assets held to maturity

These are non-derivative financial assets with fixed or determinable payments, and a fixed maturity, for which the company has the firm intention and ability to hold until maturity.

This cost is calculated as the amount initially recognized, less the principal repayments, plus or minus the accumulated amortization, using the effective interest rate method of any difference between the initially recognized value and the maturity amount. This calculation includes all the fees and points paid or received between the parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums and discounts. For investments carried at amortized cost, gains and losses are recognized in income when the investments are derecognized or impaired, as well as through the amortization process.

The financial assets that the Group decides to maintain in its portfolio for an indefinite period are not included in this category.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These assets are carried at amortized cost using the effective discount rate. Gains and losses are recognized in income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Available-for-sale financial assets

Includes financial assets not classified in the previous categories. After initial recognition these assets are measured at fair value with gains or losses being recognized as a separate component of equity until they are derecognized or until they are determined to be impaired at which time the accumulated gain or loss previously reported in equity is included in the income statement.

In the case of securities that are actively traded in organized financial markets, the fair value is determined by reference to quoted market bid prices at the close of business on the balance sheet date. For those investments where there is no active market, the fair value is determined by using valuation techniques based on recent transaction prices between independent parties, on the current market value of another substantially similar instrument, on the discounted cash flow analysis and on the option pricing models.

When the fair value cannot be reliably estimated, investments in other companies are left at cost value.

Inventories

Inventories are measured at the lower of purchase or production cost and expected net realizable value. Costs incurred for bringing each product to its present location and storage are accounted for as follows:

Raw material	– purchase cost based on average weighted cost;
Finished and semi-finished goods	– cost of direct materials and labour plus a portion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

The net realizable value is the estimated selling price less estimated costs of completion and the estimated costs necessary to make the sale.

If necessary, provisions have been allocated for write-down of materials, finished products, spare parts and other supplies considered obsolete or with a low turnover rate, considering their expected future use and their realizable value.

Trade and other receivables

Trade receivables, which generally have a 30-120 days' payment terms, are recognized at the original invoice amount less an allowance for any non-collectable amounts in order to reflect their presumable realization value. This provision is made in the presence of objective elements indicating that the Group will not be able to collect the debts. Bad debts are written off when identified.

Cash and cash equivalent

Cash and short term deposits in the balance sheet comprise cash at banks and in hand and short term deposits with an original maturity of three months or less.

For the purpose of the consolidated cash flow statement, cash and cash equivalents are represented by cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Interest-bearing loans and borrowings

All loans and borrowings are initially recognized at the fair value of the consideration received less directly attributable transaction costs.

After the initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost, using the effective interest rate method.

Gains and losses are recognized in net profit or loss when the liabilities are derecognized, as well as through the amortization process.

De-recognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset but has assumed an obligation to pay them in full without material delay to a third party;
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and benefits of the ownership of the assets, or (b) has neither transferred nor retained substantially all the risks and benefits of the asset but has transferred the control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and benefits of the asset nor transferred the control of the asset, the asset is recognized in the Group's balance sheet to the extent of the Group's continuing involvement in the asset itself. The continuing involvement which takes the form of a guarantee over the transferred asset, is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender, on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Impairment of financial assets

The Group assesses at each balance sheet date whether a financial asset or group of financial assets is impaired.

Assets carried at amortized cost

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not

been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The amount of the loss shall be recognized in profit or loss.

The Group first assesses whether objective evidence of impairment exists individually, for financial assets that are individually significant, and individually or collectively for the financial assets that are not individually significant. In the absence of objective evidence of impairment for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the income statement, to the extent that the carrying amount of the asset does not exceed its amortized cost at the reversal date.

Financial assets carried at cost

If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Retribution schemes in the form of investment in capital (Stock option plans)

As established by IFRS2 – Share based payments, these schemes represent a part of the beneficiary's retribution, the cost being represented by the fair value of the options (share purchase right) calculated at the assignment date of the right, the cost of which is recorded in the Income Statement at equal amounts along the period going from the said assignment date and the date the rights are exercisable, and the matching entry is take directly to equity. Evaluations in fair value subsequent to the assignment date do not have any effect on the initial evaluation.
The Group does not have any retribution schemes in the form of investment in capital.

Provisions for contingencies and charges

Provisions for contingencies and charges are recognized when the Group has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Pensions and other post-employment benefits

TFR retirement allowance, calculated in compliance with the laws and current labour contracts, as it is considered a defined benefits plan in accordance with IAS 19, is determined separately for each company at the end of each financial period using the projected unit credit actuarial valuation method. The actuarial gains and losses are immediately recognized in the statement of the financial position by crediting or charging the retained earnings through the other components of the comprehensive income statement in the financial year in which they occurred. Some Group companies have operated defined contribution pension schemes; the payments related to defined contribution plans are recognized in income statement as costs when incurred.

Non-current assets available for sale and liabilities associated with these assets

The non-current assets (or group of assets and liabilities) are classified as intended for sale if available for immediate sale in the present state, except for recurring transaction conditions for the sale of that type of asset and if the sale is highly probable.

These assets are carried at:

- the lower between the carrying amount and fair value net of sales costs, any impairment loss is taken to profit and loss, unless part of a business combination operation, otherwise
- at fair value net of sales costs (without the possibility of measuring write-downs during initial recognition) , if part of a business combination operation.

In any case the depreciation process is interrupted when the asset is classified as available for sale.

The assets and the liabilities directly connected to a group of assets to be sold are distinctly classified in the income statement, as well as the pertinent reserves of accumulated profits or losses directly taken to equity. The net result of sale operations is indicated in a specific item of the profit and loss statement.

The Group does not own any non-current assets available for sale and liabilities associated with these non-current assets.

Revenue recognition

Revenue is recognised to the extent of the probability of the economic benefits coming to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods

Revenue is recognized when the significant risks and rewards linked to the ownership of the goods have passed from the company to the buyer.

Services rendered

Revenue from rental activity is recognized on the basis of the contracts in force at the balance sheet date.

Revenue from services rendered (technical servicing, repairs, other services rendered) is recognized when the service is actually rendered.

Interest income

Revenue is recognized as interest accrues (using the effective interest method that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset).

Dividends

Revenue is recognized when the shareholders' rights to receive the payment is established.

Government grants

Government grants are recognized where there is reasonable assurance that the grants will be received and all related conditions will be complied with. When the grants relate to expense items they are recognized as income over the period necessary to match the grants on a systematic basis to the costs that they are intended to compensate. On the other hand, when the grants are related to fixed assets (contribution in capital) they are recognized as components adjusting the book value of the assets to which they refer. Consequently, they are recognized as income during the useful life of the amortizable asset through the reduction of the amortization cost.

Financial charges

Financial charges are taken to income statement when they are incurred.

Income tax

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to taxation authorities. The tax rates and the tax laws used to compute the amount are those that are enacted at the balance sheet date.

Deferred tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the same time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interest in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilised except:

- where the deferred income tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Income tax related to items recognized directly in equity is recorded directly in equity and not in the income statement.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value Added Tax

Revenues, expenses and assets are recognized net of the amount of VAT except where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority in which case VAT is recognized as part of the cost of acquisition of the asset or part of the expense item taken to the income statement. The net amount of VAT that can be recovered from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Derivative financial instruments and hedging

Derivatives are recognized at fair value and variations in fair value are taken to profit and loss when they do not qualify as hedge accounting due to the type of instrument or because the Company chooses not to perform the hedge effectiveness test. Derivative instruments may be classified as hedging instruments when the relation between the derivative and hedged object is formally documented and hedge effectiveness, periodically verified, is measured in accordance to IAS 39. When the hedging derivatives cover the risk of variations in cash flow of the hedged elements (Cash Flow Hedge) the derivatives' effective portion of variations in fair value is directly taken to net equity, whereas the ineffective portion is directly taken to profit and loss. The amounts recognised directly in net equity are reflected in profit and loss coherently with the economic effects produced by the hedged element. On the other hand, when the derivatives hedge against the risk of variation in fair value of the hedged objects (Fair Value Hedge) the fair value variations of the derivatives are directly recognised in profit and loss; coherently, the hedged instruments are suitable for reflecting variations in fair value associated with the hedged risk.

3. Segment information

Below information is provided on the Group's operating segment, corresponding to the following geographic areas: Europe, North America and Rest of the World. Sales to external customers disclosed in geographic segments are based on their geographic location. With regards to the gross operating result and the operating result the costs are allocated according to their origin as the Group's business model and the reporting system used by management identify the origin as the management system used for costs.

The following tables provide figures for the financial years ended 31 December 2013 and 2012 according to geographic areas:

31 Dec 2013	Revenue	Group sales	Revenue in contr.	Gross Oper. Result	Oper. Result	Finan. Income/ Charges	Value adjust. on financ. assets	Comp. results at NE	Result before tax	Tax for the period

(1): for sales
(2): exchange rate differences, reclassification or others

Investments in plant, machinery and other assets, made in 2013 refer to the purchase of goods necessary to maintain a continuous level of modernization as required for increasing productivity and efficiency.

The tangible fixed assets in progress regarding the construction of the production plant and related machinery of the China subsidiary Bolzoni Auramo Wuxi, which became ready for the use in the course of 2013, are included in the 'Reclassification' column

Below is an overview of the gross and net carrying amounts of the fixed assets acquired through lease contracts which are still in life. Such assets belong to the Parent and the French subsidiary.

	31.12.2013		31.12.2012	
	Gross value	Net value	Gross value	Net value
Buildings	204	93	204	99

Equipment	45	-	45	-
Other goods	677	-	677	-
Total	**4,348**	**93**	**4,348**	**99**

5. Goodwill

Goodwill acquired through business combinations has been allocated to three distinct cash-flow generating units in order to verify any possible impairment indicator:

- Auramo Oy
- Bolzoni Auramo GmbH
- Hans H. Meyer GmbH

	31.12.2012	Addition	Sale	Exchange rate diff.	31.12.2013
Auramo OY	8,150	-	-	-	8,150
Bolzoni Auramo GmbH	181	-	-	-	181
Hans H. Meyer GmbH	2,287	-	-	-	2,287
Total	**10,618**	**-**	**-**	**-**	**10,618**

Auramo OY, Bolzoni Auramo GmbH and Hans H. Meyer GmbH

The estimated recoverable amount of goodwill recorded in the financial statements has been calculated by four-year business plan and related discounted cash flows model approved by the Board of Directors, which, for the determination of the assets value in use, foresees the estimate of future cash flows and the application of an appropriate discounting rate.
With reference to the impairment tests it should be noted that to determine the value in use, the following assumptions have been considered:

- the Terminal Value has been determined on the basis of the estimated expected net operating income over a period of time equivalent to the estimated useful life of the activity of the company under evaluation, assuming a 'g' growth rate of 1%, less than the expected growth rate for the sector;
- discount rates (WACC) applied to projections of cash flows range from 6.53% and 6.62%. These rates, from which tax effects have been deducted, have been determined, in line with those used in the previous financial year. The variability of these rates between the different cash flow generating units mainly depends on the different risk premium related to the specific country and on the different tax effects in each country where the single units are situated.

The impairment tests performed on existing goodwill have highlighted that the values used are significantly above the book value.
A sensitivity analysis was performed on the possible recoverable value of goodwill assuming a variation in WACC of one percentage point and reducing the growth rate to 0% and no critical points emerged.

6. Intangible fixed assets

	01.01.13	Addition	Amorti-zation	Decr. (1)	Reclass.	Other variations (2)	31.12.12
Development costs	4,720	1,143	-	-	45	-	5,908

Licences	874	414	(446)	-	(2)	(9)	831
Sundry	55	27	(28)	-	(7)	-	47
Net carrying amount of Intangible Fixed Assets	**3,139**	**1,584**	**(1,110)**	**-**	**-**	**(8)**	**3,605**

(1): for sales or variation in consolidation area
(2): exchange rate differences or others

The value of the intangible fixed assets generated internally and capitalized in 2013, entirely attributed to item “Development costs” amounts to 1.143 thousand euros (2012: 392 thousand euros) and consists of personnel costs. These projects refer in particular to the development of new technical solutions for existing products and involve the production plants in Italy, Germany and China. At 31 December 2013 development costs included 432 thousand euros related to running projects but whose amortization has not yet begun.

7. Investment in associates companies

The Group has the following investments in associated companies assessed at net equity:

	2013	2012
Auramo South Africa	374	513
Xin Huaxin China	1,613	1,503
Total	**1,987**	**2,016**

The following table provides the main financial information on the investment in Auramo South Africa:

	2013	2012
Portion of the associate’s equity:		
Current assets	80	319
Non-current assets	341	319
Current liabilities	(42)	(112)
Non-current liabilities	(5)	(13)
Net asset	374	513
Portion of the associate’s revenue and result:		
Revenue	298	562
Earnings/(losses)	(20)	4

The following table provides the main financial information on Xin Huaxin:

	2013	2012
Portion of the associate's equity:		
Current assets	967	721
Non-current assets	816	772
Current liabilities	(253)	(140)
Non-current liabilities	-	-
Net asset	1,530	1,353
Portion of the associate's revenue and result:		
Revenue	3,218	3,156
Earnings/(losses)	105	180

8. Financial receivables and other financial assets (non-current)

Credits and other financial assets mainly refer, for Euro 82 thousand, to collection notices related to the appeal made by the Parent Company to *Commissione Tributaria Provinciale* (Tax Commission for the Province), described in Note 34.

9. Financial assets held to maturity

At 31 December 2013 there are no financial assets held to maturity.

10. Taxation

10.1 Deferred tax

The situation at 31 December 2013 and 2012 was the following:

	Consolidated balance sheet		Consolidated income statement	
	2013	2012	2013	2012
Deferred tax liability				
Capitalization of internal costs	(27)	(39)	12	15
Pensions	(4)	(4)	-	60
Variation in tax evaluation parent's inventory	(8)	(46)	38	17
Gains on sale of fixed assets split over 5 years	(6)	(6)	-	(2)
Fair value assessment as deemed cost of Meyer fixed assets	(609)	(632)	23	23
Fair value assessment as deemed cost of Meyer brand	(212)	(287)	75	75
Sundry	(321)	(210)	(111)	138
	(1,187)	**(1,224)**		
Deferred tax assets				
Fiscal losses carried forward on foreign subsidiaries	2,234	1,509	725	(163)
Obsolescence provision on parent's inventory	74	86	(12)	5
Offsetting infra-group's profit in stock	586	667	(81)	99
Non tax deductible provisions	80	70	10	(1)
Minor balances on subsidiaries	198	196	2	(2)
Exchange rate fluctuations	45	39	6	39
Sundry	117	95	22	51
	3,334	**2,662**		
Deferred tax income			**709**	**354**

Some Group subsidiaries have fiscal losses totalling 11.273 thousand euros (2012: 11.131 thousand euros) that are available indefinitely to offset future taxable profits of those same companies where the losses have been produced. Deferred tax assets related to those losses have been recognized according to expected earnings, established on the basis of the business plans drawn up for each company. In particular, a maximum time frame covering the next three financial years has been considered. The

deferred tax assets on these losses carried to the balanced sheet amount 2.234 thousand euros (2012: 1.509 thousand euros). The amount of available fiscal losses for which deferred tax assets at 31 December 2013 have been written down amounts to 6.614 thousand euros, corresponding to deferred tax amounting to approximately 2.083 thousand euros.

As for the previous year, at 31 December 2013 no deferred tax liability was recognized on the un-distributed earnings of some subsidiaries and associates as the Group has determined that these earnings will not be distributed in the foreseeable future.

10.2 Income tax

The main components of Income tax for the years ended 31 December 2013 and 2012 are the following:

Consolidated income statement	2013	2012
Current income tax		
Current income tax charge	1,216	1,082
Deferred income tax		
Related to recognition and reversal of temporary differences	(709)	(297)
Income tax expense reported in the consolidated income Statement	**507**	**785**

Reconciliation between effective tax charge and the theoretical tax charge, calculated as product of accounting profit multiplied by domestic tax rate for the years ended 31 December 2013 and 2012, is the following:

Income tax	2013		2012	
	Amount	Rate	Amount	Rate
Applicable ordinary tax rate		27.50%		27.50%
Result before tax	612		2,671	
Theoretical tax charge	**168**		**735**	
Plus variations				
Tax free or non-taxable income	9		10	
Tax losses carried forward	582		127	
Exchange rate fluctuations	165		491	
Non-deductible costs	323		696	
Minus variations				
Other minus variations	(684)		(1,550)	
Taxable income	**1,007**		**2,445**	
INCOME TAX	**817**	**133.50%**	**672**	**25.20%**

IRAP	2013		2012	
	Amount	Rate	Amount	Rate
Applicable ordinary tax rate		3.90%		3.90%
Result before tax	612		2,671	
Theoretical tax charge	**24**		**104**	
Plus variations				
Personnel costs	12,340		11,701	
Other plus variations	1,684		1,881	
Minus variations				
Other minus variations	(4,410)		(5,750)	
Taxable amount	**10,226**		**10,503**	
IRAP INCOME TAX	**399**	**65.20%**	**410**	**15.30%**

11. Inventory

	2013	2012
Raw material	8,880	7,142
Obsolescence provision for raw material	(308)	(293)
Net raw materials	**8,572**	**6,849**
Semi-finished products	5,155	6,934
Obsolescence provision for semi-finished products	(363)	(282)
Net semi-finished products	**4,792**	**6,652**
Finished products	9,946	9,074
Obsolescence provision for finished products	(912)	(812)
Net finished products	**9,034**	**8,262**
Advance	**32**	**-**
Total inventory at lesser between cost and net realizable value	**22,430**	**21,763**

The higher inventory value is conditioned by the increase in net sales and by the inventory created in Bolzoni Auramo Wuxi.

Below are the variations in the obsolescence provision during the periods under examination:

	31.12.2012	Variation	31.12.2013
Obsolesc.prov. for raw material	293	15	308
Obsolesc.prov. for semi-finished prod.	282	81	363
Obsolesc.prov. for finished products	812	100	912
Total	**1,387**	**196**	**1,583**

The obsolescence provision is basically stable compared to the previous financial year thanks to a careful management of obsolescence, despite the increase in production volumes.

12. Trade receivables (current)

	2012	2012
Trade receivables	20,065	19,907
Bills subject to collection	4,834	4,744
Bad debt provision	(454)	(446)
Total minority receivables	**24,445**	**24,205**
Auramo South Africa	93	225
Total associate receivables	**93**	**225**
Total trade receivables	**24,538**	**24,430**

Trade receivables are stable compared to the previous financial year thanks to a careful management of working capital.

Below the trade receivables are divided according to due date:

	2013	2012
Receivables not yet due	18,045	17,622
Receivables 30 days overdue	4,419	4,212
Receivables 60 days overdue	839	1,069
Receivables 90 days overdue	322	423
Receivables more than 90 days overdue	913	1,104
Total trade receivables	**24,538**	**24,430**

Below are variations to the bad debt provision:

	2013	2012
Initial balance	446	360
Write-offs	198	158
Provisions	206	244
Final balance	**454**	**446**

For the terms and the conditions covering related party receivables, refer to note 35.
Trade receivables are non-interest bearing and generally have a due date of 30-120 days. We would like to point out that these amounts are covered by a credit insurance on 90% of the nominal value, therefore the overdue receivables do not represent a risk.

13. Tax receivables

	2013	2012
Tax receivables claimed by Meyer	-	61
IRES tax receivable claimed by Parent	561	413
Sundry	567	88
Total	**1,128**	**562**

The amount related to "IRES tax receivable claimed by Parent" refers to a receivable following the request for a refund made by the Parent in relation to the acknowledged right to IRAP deduction for years 2007-2011 and to the credit in 20132 for the advance payments made in excess with respect to the calculated taxes. The item also includes the balance of the advance tax payments made by some of the group companies, beyond the tax payable pertaining to the financial year.

14. Other receivables

	2013	2012
VAT receivables	238	821
Sundry	370	397
Total	**608**	**1,218**

15. Financial Assets available for sale

	2013	2012
Sundry	11	187
Total	**11**	**187**

The amount of 11 thousand euros includes investments in government bonds made by the subsidiary Bolzoni Auramo Pty.

16. Cash and cash equivalents

	2013	2012
Cash in hand and bank deposits	11,039	3,513
Total	**11,039**	**3,513**

Bank deposits have a variable interest rate.
Increase in cash is due to the medium-term loans obtained in the course of the financial year and not yet used.

For the purpose of the consolidated cash flow statement, the item 'Cash and cash equivalents' includes the following at 31 December:

	2013	2012
Cash in hand and bank deposits	11,039	3,513
Bank overdrafts (note 18)	(10)	(54)
Advance on notes to be collected (note 18)	(2,777)	(3,032)
Total	**8,252**	**427**

17. Share capital and reserves

	2013	2012
Ordinary shares at 0.25 euros each	25,993,915	25,993,915

During year 2013 there have been no variations to share capital.

Details of other reserves:

	Currency Transl. Diff.	IFRS transl. reserve	Consolid. reserve	Total
Balance at 31.12.2012	**(938)**	**1,344**	**28,023**	**28,429**
Profit allocation	-	-	1,948	1,948
Payment of dividends	-	-	(1,300)	(1,300)
Other changes	(408)	-	191	(216)
Balance at 31.12.2013	**(1,346)**	**1,344**	**28,862**	**28,860**

Reserve for currency translation differences
This reserve is used to record the currency differences resulting from the translation of the financial statements belonging to the foreign subsidiaries.

IAS/IFRS conversion reserve
This contains the effects on net equity following the first-time adoption of the IAS/IFRS principles on 1 January 2004.

Consolidation reserve
The consolidation reserve includes the Parent's reserves (made up of the revaluation reserve pursuant to Law 342/2000, the statutory reserve and the retained earnings resulting from the distribution of profits resolved by the Assembly of Bolzoni S.p.A. Shareholders) and highlights the effects on net equity normally resulting from consolidation operations required for standardizing the items in the financial statements of the consolidated companies to the Group's criteria, from write-offs of infra-group non-realizable profits and from the off-setting of investments against their net equity.

18. Interest bearing loans and borrowings

		Actual interest rate %	Maturity	2013	2012
Short term					
Bank overdrafts			On request	10	54
Trade advances			30-90 days	2,277	2,632
Advance on foreign business				500	400
Subsidiary loans				7,670	8,403
€ 1,500,000 unsecured bank loan	(1)	Euribor +0.25	2014	-	94
€10,000,000 unsecured bank loan	(2)	Euribor +1.30	2014	2,492	2,461
€ 6,000,000 mortgage loan	(3)	Euribor +1.50	2014	664	652
€ 5,000,000 unsecured bank loan	(10)	Euribor +1.50	2014	1,633	-
€ 2,000,000 unsecured bank loan	(4)	Euribor +1.60	2014	670	1,330
€ 2,000,000 unsecured bank loan	(5)	Euribor + 2.30	2014	691	663
€ 9,000,000 unsecured bank loan	(6)	Euribor + 2.50	2014	8,912	-
				25,519	**16,689**
Medium/short term					
€ 2,000,000 unsecured bank loan	(7)	Euribor +1.50	2013	-	2,000
€ 2,000,000 unsecured bank loan	(2)	Euribor +1.30	2014	-	499
€ 2,000,000 unsecured loan loan	(5)	Euribor +2.30	2014	-	691
€ 2,000,000 unsecured loan loan	(4)	Euribor +1.60	2014	-	670
€ 2,000,000 unsecured loan loan	(2)	Euribor +1.30	2015	250	749
€ 6,000,000 unsecured bank loan	(2)	Euribor +1.30	2016	2,299	3,793
€ 810,000 unsecured bank loan	(8)	Euribor + 7.00	2016	810	-

€ 6,000,000 unsecured bank loan	(9)	Euribor +2.00	2017	1,986	-
€ 6,000,000 mortgage loan	(4)	Euribor +1.50	2019	3,205	3,870
Other minor loans				2,266	617
				13,900	**12,889**

Bank overdrafts and advances on collectable bills subject to final payment and advance on foreign business

These mainly refer to the parent, the Spanish subsidiary and the two Italian subsidiaries.

Subsidiary loans

The short term loans to the foreign subsidiaries consist of the following:

- 0.5 million € loan obtained by the subsidiary Bolzoni Auramo Inc.;
- 0.4 million € loan obtained by the subsidiary Bolzoni Auramo GmbH;
- 1.2 million € loan obtained by the subsidiary Auramo OY;
- 0.9 million € loan obtained by the subsidiary Bolzoni Auramo Wuxi;
- 1.2 million € loan obtained by the subsidiary Bolzoni Huaxin;
- 3.5 million € loan obtained by the subsidiary Hans H Meyer GmbH,

These are unsecured bank loans.

1,500,000 euro unsecured bank loan (1)

The loan is unsecured and has been entirely repaid.

10,000,000 euro unsecured bank loan (2)

These loans are unsecured and repayable in half yearly instalments.

6,000,000 euro mortgage loans (3)

These loans, secured by a mortgage on the property in Podenzano, are repayable in half yearly instalments.

2,000,000 euro unsecured bank loan (4)

The loan is unsecured and is repayable in quarterly instalments.

2,000,000 euro unsecured bank loan (5)

The loan is unsecured and is repayable in quarterly instalments.

9,000,000 euro unsecured bank loan (6)

The loan is unsecured and is repayable in half-yearly instalments.

2,000,000 euro unsecured bank loan (7)

The loan is unsecured and has been entirely repaid.

810,000 euro unsecured bank loan (8)

The loan is secured by a bank guarantee for 340,000 euros and is repayable on maturity.

6,000,000 euro unsecured bank loan (9)

The loan, of which 2,000,000 euros have been disbursed at 31.12.2013, is unsecured and repayable in half-yearly instalments.

5,000,000 euro unsecured bank loans (10)

The loans are unsecured and repayable in quarterly instalments.

Other loans

Other loans consist of:

- 2.0 million € loan obtained by the subsidiary Hans H Meyer GmbH,
- 0.3 million € loans obtained by other Group companies.

All loans obtained by subsidiary companies are secured by comfort letters given by the parent.

Some loans are subject to the observance of the following covenants (based on the consolidated financial statements):

Loan	Covenants	2013	Limit
19.000 €/000	Net financial debts/Net equity	0.81	1.50
19.000 €/000	Net financial debts/Gross operating margin	3.53	3.50

As indicated in the above table one of the two covenants has not been observed. As a consequence, a 9 million loan has been reclassified as short term. On March 10, 2014 the Bank issued a letter authorizing the overrunning of the convents for the year 20132, without requiring any contractual modifications or the early repayment.

The non-observance of both covenants would give the other party the right to forfeit the company's benefit to the term and would therefore result in the possible early repayment of the loan (residual debt of 5.9 million of which 2.7 million due in 2014 and therefore already included in the short term loans).

Net financial position	31.12.2013	31.12.2012	Variation
A. Cash on hand	11	13	(2)
B. Current bank deposits	11,028	3,500	7,528
- *of which related to Intesa Sanpaolo*	-	*477*	*(477)*
D. CASH AND CASH EQUIVALENTS	**11,039**	**3,513**	**7,526**
E. Financial receivables	11	187	(176)
F. Current bank debts	(10,342)	(11,729)	1,387
- *of which related to Intesa Sanpaolo*	-	*(3,014)*	*3,014*
G. Current part of non-current debt	(15,177)	(4,960)	(10,217)
- *of which related to Intesa Sanpaolo*	-	*(1,707)*	*1,707*
I. CURRENT FINANCIAL DEBTS	**(25,508)**	**(16,502)**	**(9,006)**
J. CURRENT NET FINANCIAL POSITION	**(14,469)**	**(12,989)**	**(1,480)**
Financial Assets held until maturity	-	-	-
K. NON-CURRENT FINANCIAL DEBTS	(14,311)	(13,465)	(846)
- *of which related to Intesa Sanpaolo*	-	*(1,483)*	*1,483*
N. NON-CURRENT NET FINANCIAL POSITION	**(14,311)**	**(13,465)**	**(846)**
NET FINANCIAL POSITION (NET FINANCIAL DEBTS)	**(28,780)**	**(26,454)**	***(2,326)***
- of which related to Intesa Sanpaolo	**-**	***(5,727)***	***5,727***

Net financial position has passed from approximately 26.5 million euros in 2012 to approximately 28.8 million euros in 2013, mainly due to the investments paid amounting to 5.1 million euros of which 2.1 million euros related to the China production plants.

19. Employee benefits - T.F.R. retirement allowance

Variations to this fund are given below:

	2013	2012
T.F.R. fund at 01.01	**3,032**	**2,953**
Current service cost	971	741
Interest cost	58	79
Actuarial gains/losses	(204)	205
Benefits paid/transfer of funds	(1,192)	(946)
T.F.R. fund at 31.12	**2,665**	**3,032**

This fund is part of those plans with defined benefits.
Liabilities have been determined using the Projected Unit Credit Cost method which can be broken down into the following phases:

- on the basis of a series of possible financial assumptions (increase in the cost of life, increase in salaries etc.), estimates have been made regarding the possible future benefits which could be paid to each employee included in the programme in the event of retirement, death, disablement, resignation etc. This estimate will include possible increases corresponding to longer length of service matured as well as the presumable growth in the level of retribution on the date of evaluation;
- the current average value of future benefits paid has been calculated at the evaluation date, on the basis of annual interest rate adopted and the possibilities of each sum actually being paid out;
- the company's liability has been defined by identifying the portion of the current average value for the future sum paid referring to service matured in the company by the employee at the evaluation date;
- based on the liability determined at the previous point, and the reserve allocated in the financial statements in accordance with Italian civil laws, the reserve considered as being valid for the IAS purposes has been identified.

Below are details of the assumptions adopted by the Parent for calculating staff benefits:

Demographic assumptions	Executives	Non Executives
Probability of death	Mortality rate tables (named RG 48) for the Italian population as measured by General State Accounting Office	Mortality rate tables (named RG48) for the Italian population as measured by General State Accounting Office.
Probability of disablement	Tables, divided according to sex, adopted in the INPS model for projections up to 2014	Tables, divided according to sex, adopted in the INPS model for projections up to 2014
Probability of resignation	7.5% in each year	7.5% in each year
Probability of retirement	Achievement of the first of the pension requirements valid for Mandatory General Insurance	Achievement of the first of the pension requirements valid for Mandatory General Insurance
Probability for an employee of: -receiving advance payment of 70% of the accrued retirement allowance at the start of the year	3.0% in each year	3.0% in each year

Financial assumptions	Executives	Non Executives
Increase in the cost of life	2.00% per annum	2.00% per annum
Discounting rate	3.15% per annum	3.15% per annum
Increase in TFR retirement allowance	3.00% per annum	3.00% per annum

It should be noted that the Group has used the discounting index iBoxx Eurozone Corporates AA 10+ as reference at the date of evaluation.

20. Provision for contingencies and charges

	31.12.12	*Incr.*	*Decr.*	*31.12.13*	*Within 12 mths*	*After 12 mths*
Agents' termination indemnities provision	180	-	-	180	-	180
Product warranty provision	284	272	(284)	272	272	-
Other provisions	74	4	(49)	29	29	-
Total	**538**	**276**	**(333)**	**481**	**301**	**180**

Agents' termination benefit provision

This provision is to meet the related liability matured by agents operating in Italy.

Product warranty provision

This provision has been accrued to meet charges in connection with product warranties sold during the financial year and which are expected to be incurred the following year. The determination of the necessary provision is based on past figures regarding staff costs and costs for materials used for warranty servicing indicating the average impact of these incurred costs incurred with respect to the pertinent turnover.

21. Liabilities related to derivate instruments

This item represents the fair value of the four derivative contracts on Group's interest rates. Of these only two contracts have all the characteristics for classification as hedging according to the related standards. For these contracts recognition is directly to net equity (cash flow hedge reserve, see variations to net equity) whereas for the remaining contracts the fair value is accounted for in the income statement.

Below are the main figures of the above-mentioned contracts:

		31.12.2013			31.12.2012		
	Maturity	Notional	Positive Fair value	Negative Fair value	Notional	Positive Fair value	Negative Fair value
IRS accounted for according to cash flow hedging	2016	2,600	-	75	3,196	-	120
IRS which do not reflect the requirements established by IAS 39 IAS 39 to be qualified as hedging	2016	8,000	-	314	8,000	-	456
IRS accounted for according to cash flow hedging	2017	9,000	13	-	-	-	-
IRS which do not reflect the requirements established by IAS 39 to be qualified as hedging	2017	3,000	-	35	-	-	-
Total derivatives for hedging against interest rate risk		**22,600**	**13**	**424**	**11,196**	**-**	**576**

22. Trade payables

	2013	2012
Advance from customers	29	14
Domestic suppliers	12,708	10,821
Foreign suppliers	4,663	5,474
	17,400	**16,309**

Trade payables are non-interest bearing and are normally settled on a 90 day basis approx.

For terms and conditions concerning related parties, see note 35.

Domestic supplier payables at 31 December 2013 include 153 thousand euros for investments in tangible fixed assets made during the second half of the period (Note 4). The increase in trade payables is due to the increased volumes and inventory.

23. Other payables

	2013	2012
Payables to employees for wages	1,614	1,124
Payables to employees for matured but unused holidays	648	734
Tax collection for employees pay	355	355
Other accrued expenses	849	868
VAT	107	80
Other liabilities	1,849	2,146
Social security payables	1,105	1,085
	6,527	**6,392**

24. Payables for income taxes

	2013	2012
Debt for income tax	123	384
	123	**384**
Within the financial period	*123*	*384*
After the financial period	-	-

INCOME STATEMENT

Revenue

For the break-down of revenue, please read note 3 regarding Segment Information.

25. Other revenue

	2013	2012
Sundry income	278	514
Gains on disposal	140	37
	418	**551**

Sundry income mainly includes refund of expenses charged to third parties and non-operating profit. Gains on disposal refer mainly to the disposal of divested industrial equipment.

26. Costs for raw material and consumable supplies

	2013	2012
Raw material	26,085	24,887
Commercial goods	2,184	2,388
Semi-finished products	18,075	19,827
Other purchases for production	3,200	2,916
Sundry purchases	1,867	1,818
Accessory expenses	622	634
Finished products	3,748	1,663
	55,781	**54,133**

The higher costs for raw materials and consumable supplies is linked to the increase in sales volumes.

27. Service costs

	2013	2012
Industrial services	10,370	9,892
Commercial services	3,644	3,408
General services	6,088	6,867
Costs related to use of third party assets	2,265	2,216
	22,367	**22,383**

Service costs have basically remained stable compared to the previous financial year and therefore their percentage impact on income has decreased.

28. Personnel costs

	2013	2012
Wages and salaries	25,961	25,314
Social security	6,332	5,665
TFR retirement allowance (note 19)	971	535
Sundry costs	1,212	1,207
	34,476	**32,721**

Following the review of accounting standard IAS 19 – *Employee benefits* which has brought some modifications to the accounting of actuarial gains and losses relating to define benefit plans, as of January 1, 2013 the actuarial components relating to these plans are no longer accounted for in the income statement but in the comprehensive income statement, with resulting recognition in the Group's net equity.

During the financial year 2013 non-recurring costs amounting to 472 thousand euros have been recorded following the reorganisation of the European sales network.

Average number of Group employees at 31 December:

	31.12.2013	31.12.2012	Variation
Top Managers	40	28	12
First-line managers	6	7	(1)
White collar	321	353	(32)
Blue collar	385	347	38
Total	**752**	**735**	**17**

29. Other operating costs

	2013	2012
Tax and duty	465	406
Bad debt	6	17
Losses on sale of fixed assets	74	121
Sundry	317	338
	862	**882**

Under the item 'Sundry' are recorded costs of administrative and legal nature, association fees and donations referred to the various group companies.

30. Financial income and charges

	2013	2012
Financial expenses	(1,529)	(1,780)
Financial income	187	227
Gains and (Losses) on exchange rates	(804)	25
Net financial income (expenses)	**(2,146)**	**(1,528)**

Compared to the previous year, financial expenses have decreased, mainly due to the control of interest rates applied by banks despite the greater financial exposure with regards to banks.

Exchange rate differences are mainly due to the devaluation in the Australian dollar with regards to the Euro.

30.1 Financial expenses

	2013	2012
Interest on short term payables (overdrafts and credit disinvestments)	192	287
Interest on medium/long term loan payables	916	920
Fair value evaluation on derivatives	102	191
Charges other than above (lease contracts and sundry)	319	382
	1,529	**1,780**

30.2 Financial income

	2013	2012
Interest income from customers	134	212
Income other than above	53	15
	187	**227**

30.3 Exchange rate gains and losses

	2013	2012
Exchange rate gains	637	646
Exchange rate differences following translation	(358)	(401)
Exchange rate losses	(1,083)	(220)
	(804)	**25**

31. Stock option plan

At the date of the consolidated financial statements the Group does not have any stock option plans running.
At the balance sheet date, Bolzoni S.p.A. has not issued any convertible bonds.

32. Earnings per share

Basic earnings per share are calculated by dividing the year's net profit attributable to the ordinary shareholders of the parent by the weighted average number of ordinary shares outstanding during the year. Below are details on earnings and information on the shares used to calculate basic and diluted earnings per share:

Earnings/ (losses) per share	2013	2012
Net group profit attributable to ordinary shareholders	123	1,948
Average number of ordinary shares (n°/000)	25,994	25,994
Basic earnings per ordinary share	0,005	0.075

33. Dividends

During the financial year 2013 dividends were approved and paid out for the amount of € 1.361 thousand (2012: €1.119 thousand). The proposal to the Shareholders' meeting regarding dividends (not recognised as liabilities at 31 December) amounts to € 909,787.03 (2012: €1,299,695.75). The proposed resolution regarding profits, if approved, will result in the payment of 0.035 euros per share (2012: €0.05).

34. Commitments and contingencies

Capital commitments

At December 31, 2013 and at December 31, 2012 the value of the Group's commitments was not material.

Legal litigations

In the course of financial year 2008 the Tax Police made an inspection on financial years 2006 and subsequent. The notification report dated 3.7.2008 did not evidence any irregularities of a certain importance.

On December 14, 2010 the Tax authority of Piacenza prepared the assessment notice n°97036 concerning the observations by the Tax Police regarding financial year 2005. On February 11, 2011 the Parent prepared an appeal to the Provincial Tax Commission requesting the cancellation of the observations.

On June 9, 2011 the Tax Authorities of Piacenza prepared assessment report n° 46881 concerning observations made by the Tax Police regarding financial year 2006 and assessment report n° 44746 concerning observations made by the Tax Police regarding financial year 2007. On September 20, 2011 the Parent prepared two appeals to the Provincial Tax Commission requesting the cancellation of the majority of the observations.

In relation to the tax assessment report n°46881 a nd 44746, a tax collection notice was received at the end of December 2011, paid at the end of February 2012 and booked under non-current receivables for the amount of 164 thousand euros.

On January 30, 2014 the Company and the Tax Authorities signed a conciliation document covering all the assessment notices regarding the Tax Police reports. The economic-equity effects, of modest entity, have already been included in the financial statements.

Guarantees granted

At 31 December 2013 the Bolzoni Group has the following guarantees in progress:

- it has destined some land and buildings as guarantee against two mortgage loans (see note 18);
- it has granted comfort letters to a bank on a loan given to the subsidiary Bolzoni Auramo Inc. for the amount of US$ 910,000 (2012: US $ 910,000);
- it has granted a surety to a bank for the amount of € 800,000 (2012: € 800,000) in favour of the subsidiary Bolzoni Auramo GmbH;
- it has granted a surety to a bank for the amount of € 1,600,000 (2012: € 1,600,000) in favour of the subsidiary Bolzoni Auramo S.l.;
- it has granted a surety to a bank for the amount of € 1,500,000 (2012: € 1,500,000) in favour of the subsidiary Hans H. Meyer GmbH;
- it has granted a surety to a bank for the amount of € 650,000 (2012: € 650,000) in favour of the subsidiary Bolzoni Italia Srl;
- it has granted a surety to a bank for the amount of € 2,700,000 (2012: € 2,000,000) in favour of the subsidiary Auramo OY;
- it has granted a surety to a bank for the amount of € 630,000 (2012: € 630,000) in favour of the subsidiary Bolzoni Auramo S.a.r.l.;
- it has granted a surety to a bank for the amount of € 304,898 (2012: € 304,898) in favour of the subsidiary Bolzoni Auramo S.a.r.l.;
- it has granted a surety to a supplier for the amount of € 100,000 (2012: € 100,000) in favour of the subsidiary Bolzoni Auramo Shanghai;
- it has granted a surety to a bank for the amount of € 950,000 (2012: € 950,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 1,800,000 (2012: € 1,800,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 1,800,000 (2012: € 1,800,000) in favour of the subsidiary Hans H. Meyer GmbH;
- it has granted a surety to a bank for the amount of € 500,000 (2012: € 500,000) in favour of the subsidiary Hans H. Meyer GmbH.;

- it has granted a surety to a bank for the amount of € 2,000,000 (2012: € 0) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 225,000 (2012: € 225,000) in favour of the subsidiary Bolzoni Italia Srl;
- it has granted a surety to a bank for the amount of € 1,100,000 (2012: € 0) in favour of the subsidiary Bolzoni Auramo Wuxi; and
- it has granted a surety to a supplier for the amount of € 500,000 (2012: € 500,000) in favour of another supplier.

35. Disclosure on related parties

The following table indicates the total amount of transactions with related parties for the relevant financial year (further information on open balances at the end of the year can be found in notes 12 and 22).

Related parties		Revenue with related parties	Costs with related parties	Related parties receivables	Related parties payables
Associates:					
Auramo South Africa	*2013*	503	-	93	-
	2012	980	-	225	-
Longxin Precise Forging	*2013*	-	*333*	-	*198*
	2012	-	*171*	-	*113*
Hebei Jing County Huaxin	*2013*	-	-	-	-
	2012	-	-	-	401
Jing County Xin Huaxin	*2013*	2.364	1.208	-	61
	2012	219	-	411	-
Other related companies:	*2013*	-	-	-	-
Intesa-Sanpaolo Group	*2012*	1	186	477	6.204
Other related companies:	*2013*	-	309	-	-
	2012	-	216	-	-
Total associated and related companies:	*2013*	2.867	1.850	93	259
	2012	1.200	573	1.113	6.718

Transactions with other related parties

Other related parties

During the first half of 2013 the Intesa-Sanpaolo Group reduced its stake in the Parent's share capital to under 2% and consequently, is no longer considered a related party (2012: below 5%). A manager of Intesa-Sanpaolo Group (Davide Turco) is a member of the parent's Board of Directors.

Auramo OY, entirely controlled group company, rents the property situated in Vantaa (Finland) where its offices and production plant are located, from Kiinteisko OY Auran Pihti, a company controlled by Mr Karl-Peter Otto Staack, a member of the board of directors. The contract establishes the payment of an annual rent of approximately 309 thousand euros (2012: approx. 216 thousand euros) .

Terms and conditions of transactions between related parties

Transactions between related parties are performed at normal market prices and conditions. Outstanding balances at year end are unsecured, interest free and are settled in cash. No guarantees have been provided or received for any related party receivables or payables. For the year ended 31 December 2013 the Group, as in previous years, has not made any provision for doubtful debts referring to amounts owed by related parties.

36. Financial risk management: objectives and policies

The Group's principal financial instruments, other than derivatives, include bank loans, financial leases, short term deposit and cash bank accounts. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial instruments, such as trade payables and receivables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are those in connection with interest rates, liquidity, exchange rates and receivables. The Board of Directors reviews and agrees on the policies for handling each of these risks and they are summarised below. The Group's accounting principles in relation to derivatives are set out in note 2.4.

The Group has also entered into derivative transactions, mainly including forward currency contracts. The purpose is to hedge against the interest rate and currency risks arising from the Group's operations and its sources of finance. At 31.12.2013 there are no forward contracts open on foreign currencies.

The Group's policy is that no trading in financial instruments shall be undertaken for speculative purposes. For the financial year under examination only two IRS contracts (see Note 21) do not appear to follow the hedging parameters established by IFRS.

Interest rate risk

With a part of its loans in euro at a floating interest rate, the Group believes it is exposed to the risk that a possible increase in rates could increase future financial charges. Below are shown the effects that could derive from a 0.25 BPS variation in interest rates.

	Variations in presumptions	Effect on gross profit before tax
2013	0.25 BPS	(40)
	-0.25 BPS	40
2012	0.25 BPS	(44)
	-0.25 BPS	44

As at 31 December 2013 loans hedged against interest rate risk amounted to 22.6 million euros.

The Group has four Interest Rate Swap contracts running which foresee the exchange of the difference between variable and one or more fixed rate interest amounts, calculated by reference to an agreed notional principal amount. Two IRS contracts do not appear to observe the requisites established by the international accounting standards for qualification as a hedging instrument (see note 21).

Foreign currency risk

The Group has identified its exposure to foreign currency risks mainly in connection with future collection of amounts in foreign currency (mainly USD) as their subsequent translation could take place at potentially unfavourable conditions, with a negative impact on the year's results.

As described in the section dedicated to the consolidation principles the financial reports of the subsidiaries prepared in currencies other than Euro, are translated using the exchange rates published in the web site of the Italian Exchange Rate Office.

The following table shows the effects of possible variations to exchange rates on the main items of financial reports for the subsidiaries operating outside the Euro zone.

	Currency	Increase/ Decrease	Effect on Net Equity*	Variation on Turnover	Variation on profit before tax
2013	*USD*	+ 5% / -5%	- 4 / + 5	- 622 / + 687	- 5 / + 5
	SEK	+ 5% / -5%	- 10 / +12	- 193 / + 213	- 14 / + 15
	GBP	+ 5% / -5%	- 1 / +1	- 240 / + 265	- 1 / + 2
	$ AUS	+ 5% / -5%	+ 34 / -38	- 178 / + 197	+ 34 / - 38
	RMB	+ 5% / -5%	+ 31 / -35	- 417 / + 461	+ 31 / - 35
	SLOTY	+ 5% / -5%	- 3 / +4	+ 98 / + 109	- 4 / + 5
	$ CAN	+ 5% / -5%	+ 1 / -1	- 97 / + 107	+ 1 / - 1
2012	*USD*	+ 5% / -5%	+ 10 / - 12	- 540 / + 597	+ 10 / - 12
	SEK	+ 5% / -5%	- 7 / + 8	- 213 / + 235	- 12 / + 13
	GBP	+ 5% / -5%	- 5 / + 5	- 282 / + 311	- 5 / + 5
	$ AUS	+ 5% / -5%	+ 9 / - 10	- 138 / + 152	+ 9 / - 10
	RMB	+ 5% / -5%	+ 8 / - 9	- 148 / + 164	+ 8 / - 9
	SLOTY	+ 5% / -5%	- 3 / + 4	- 93 / + 103	- 4 / + 4
	$ CAN	+ 5% / -5%	- 4 / + 4	- 100 / + 110	- 6 / + 6

* net of the theoretical tax effect. The theoretical tax effect in the single countries home to the various subsidiaries has been considered. Furthermore for those subsidiaries presenting negative results no tax effects have been considered.

The Group has entered into derivative financial contracts which hedge against exchange rate risks produced by cash flow from payments received in foreign currency transactions with its American subsidiary Bolzoni Auramo Inc.: more specifically, the instruments used are essentially forward currency contracts and Put options.

As these derivative contracts are generally drawn up after the invoicing of sales or of the purchases generating the related cash flows and so it is not possible to identify a close correlation between the maturity of the derivative contracts and the dates of the underlying financial cash flows, the contracts under examination can therefore be classified as net hedging operations on trade receivables/ payables in foreign currency. Consequently, they have been recognized as financial assets held for trading and are therefore accounted for and assessed at fair value. The fair value variations are charged to income statement under financial income and charges. At 31 December 2013 there are no derivative contracts running of this nature.

Following the expansion of its activities ton Asian markets, the Group is also exposed to foreign currency risks related to purchases of raw materials settled in both Chinese Yuan (CNY) and US Dollars (USD); the volume of these operations is however minimal.

Risk of variations in price of raw material

The Group's exposure to the price risk is considered to be limited as the Group adopts a policy of partial hedging against the risk of fluctuations in the cost of raw materials thanks to supplier contracts at fixed prices for a period varying from three to six months and which mainly involve steel.

Credit risk

Insurance policies have been taken out for all the Group companies in order to give protection against insolvency risks and which cover almost all the exposure.

With respect to the credit risk arising from the other financial assets of the Group, which include cash and cash equivalents and available-for-sale financial assets, the maximum risk is equivalent to the carrying amount of these assets in the event of default of the counterparty. These are normally primary domestic and international financial institutions.

There are no significant concentrations of credit risk within the Group.

Liquidity risk

The liquidity risk is linked to the difficulty of finding funds to meet the company commitments. It can be caused when available resources are insufficient to meet the financial obligations, according to the established terms and due dates, if a credit line is suddenly revoked or if the Group needs to fulfil its financial payables before their natural due date. Thanks to a careful and cautious financial policy and to continue monitoring of both the balance between the credit lines granted and used, and the balance between short term and medium-long term debts, the Group is provided with lines of credit adequate in quality and quantity to meet its financial needs.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, finance leases and hire purchase contracts with purchase option.

The Group therefore performs a continue check of the estimated financial requirements so that any necessary actions can be promptly taken (finding additional lines of credit, increases in share capital, etc.).

Fair value

Below is a comparison between the carrying amounts and the fair value of all the Group's financial instruments as indicated in the financial statements, divided according to category:

	Carrying amount		*Fair value*	
	2013	*2012*	*2013*	*2012*
Financial assets				
Cash in hand	11,039	3,513	11,039	3,513
Other financial assets (long term)	-	-	-	-
Financial assets available for sale	11	187	11	187
Financial liabilities				
Bank overdrafts and advance on notes to be collected	(2,787)	(3,085)	(2,787)	(3,085)
Loans:				
At variable rates	(36,223)	(27,069)	(36,233)	(27,069)
At fixed rates	(810)	-	(810)	-
Forward currency contracts *	-	-	-	-
Swap Interest Rates *	-	-	-	-

* accounted for in the financial statements at fair value.

Fair value

Fair value of derivatives and loans has been calculated by discounting the expected future cash flows at prevailing interest rates.

Interest rate risk

The following table shows the carrying amount, according to maturity date, of the Group's financial instruments exposed to interest risk.

Fixed rate	<1 year	>1<2 yrs	>2<3 yrs	>3<4 yrs	>4<5 yrs	> 5 Yrs	Total
Simest loan	-	-	(810)	-	-	-	(810)

Variable rate	<1 year	>1<2 yrs	>2<3 yrs	>3<4 yrs	>4<5 yrs	> 5 Yrs	Total
Liquid funds	11,039	-	-	-	-	-	11,039
Financial receivables	11	-	-	-	-	-	11
Derivative liabilities	-	(411)	-	-	-	-	(411)
Overdrafts on bank accounts	(10)	-	-	-	-	-	(10)
Advance on collectable bills subject to final payment	(2,277)	-	-	-	-	-	(2,277)
Advance on foreign business	(500)	-	-	-	-	-	(500)
Subsidiary loans	(7,670)	(2,265)	-	-	-	-	(9,935)

Banca di Piacenza loan	(642)	(658)	(686)	-	-	-	(1,986)
Unicredit Bank loan	(746)	(769)	(393)	-	-	-	(1,908)
Unicredit Bank loan	(8,912)	-	-	-	-	-	(8,912)
Cariparma Bank loan	(691)	-	-	-	-	-	(691)
Cariparma mortgage loan	(442)	(446)	(461)	(470)	(479)	(243)	(2,541)
GE Capital loan	(498)	(498)	(250)	-	-	-	(1,246)
B.ca Nazionale Lavoro loan	(670)	-	-	-	-	-	(670)
Banco Popolare loan	-	-	(500)	(1,487)	-	-	(1,987)
Deutsche Bank loan	(992)	(991)	(750)	-	-	-	(2,733)

37. Remuneration of Directors and Statutory Auditors

The following table shows the remuneration during year 2013 for the Directors and Statutory Auditors of the parent and subsidiary companies:

Name	Amount paid by Parent	Amount paid by Group companies	Description
Emilio Bolzoni	230	33	Director
Roberto Scotti	290	33	Director
Luigi Pisani	28	-	Director
Franco Bolzoni	28	-	Director
Pierluigi Magnelli	28	-	Director
Davide Turco	28	-	Director
Karl Peter Otto Staack	28	-	Director
Raimondo Cinti	28	-	Director
Giovanni Salsi	28	-	Director
Paolo Mazzoni	28	-	Director
Claudio Berretti	28	-	Director
Total	**772**	**66**	
Giorgio Picone	25	-	Auditor
Carlo Baldi	14	-	Auditor
Maria Gabriella Anelli	14	-	Auditor
Total	**53**	**-**	

38. Other information

The Parent has not carried out any operations to favour the purchase or the subscription of shares in accordance with article 2358, paragraph 3 of the Civil Code.

The Group appointed its auditors Deloitte & Touche S.p.A. in April 2012. Below is a summary of fees paid during the financial period in exchange for services rendered to the Group by the following:

a) by the audit company for auditing services;

b) by the audit company, for services other than above;

c) by companies belonging to the audit company's network, for services divided according to type.

		Partial consideration	Total consideration
Audit	Parent's Auditor	80	
	Other companies of Deloitte & Touche network	88	168

STATEMENT ON THE COMPANY AND CONSOLIDATED FINANCIAL REPORT

ACCORDING TO ART. 81-TER OF CONSOB RULING n° 11971 OF MAY 14 1999 AND SUBSEQUENT MODIFICATIONS AND INTEGRATIONS

1. The undersigned Roberto Scotti, C.E.O., and Marco Bisagni, manager responsible for the preparation of the corporate accounting documents of Bolzoni S.p.A., also taking into account the provisions contained in art. 154-bis, paragraphs 3 and 4 of the legislative decree n° 58 of February 24 1998, do hereby certify:
    - the appropriateness in relation to the company's characteristics and
    - the actual application of the administrative and accounting procedures behind the preparation of the company and consolidated financial statement for the period 1 January – 31 December 2013.

2. In this respect, the C.E.O. and the manager responsible for the preparation of the corporate accounting documents highlight that
    - the accounting figures for the financial period 2013 have been subjected to specific and adequate controls which have not highlighted any significant deficiencies.

3. We also certify that:

    3.1 the Company and Consolidated financial statements at 31 December 2013:
    a) have been drawn up according to the applicable International Accounting _Standards as recognised by the European Community in compliance with ruling (CE) n° 1606/2002 by the European Parliament and Council on 19 July 2002;
    b) correspond to the results of the accounting books and entries;
    c) are suitable for providing a true and precise portrayal of the balance sheet and economic-financial situation of the issuer and the group of companies included in the consolidation

    3.2 the Management Report includes a reliable analysis of the management trend and result, together with situation of the issuer and the group of companies included in the consolidation, in addition to a description of the main risks and uncertainties to which they are exposed.

Casoni di Podenzano, 13 March 2014

AUDITORS' REPORT PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of
BOLZONI S.p.A.

1. We have audited the consolidated financial statements of Bolzoni S.p.A. and subsidiaries (the "Bolzoni Group") as of December 31, 2013, which comprise the consolidated balance sheet, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity, the consolidated cash flow statement and the related explanatory notes. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's consolidated financial statements, whose data are presented for comparative purposes, reference should be made to our auditors' report issued on March 28, 2013. Such comparative data have been revised to take into account of the adoption of the new amendment of IAS 19 – Employee Benefits. These revisions to comparative data and related disclosures included in the explanatory notes have been reviewed by us in order to express our conclusions on the consolidated financial statements as of December 31, 2013.

3. In our opinion, the consolidated financial statements give a true and fair view of the financial position of the Bolzoni Group as of December 31, 2013, and of the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

4. The Directors of Bolzoni S.p.A. are responsible for the preparation of the Management Report and the Report on Corporate Governance and Ownership Structure published in the section "Investor Relations – Corporate Governance" of Bolzoni S.p.A.'s website, in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the Report on Corporate Governance and Ownership Structure, with the financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the Report on Corporate Governance and Ownership Structure are consistent with the consolidated financial statements of Bolzoni Group as of December 31, 2013.

ACCOUNTING PRINCIPLES AND EXPLANATORY NOTES

1. Corporate information

Bolzoni S.p.A. is a limited company incorporated and domiciled in Podenzano (PC), località "I Casoni" and its principal activity is in the sector of attachments for fork lift trucks.

The publication of Bolzoni S.p.A.'s (the Company) financial statements for the year ended 31 December 2013 was authorized by the resolution taken by the directors on March 13th 2014.

As at December 31 2013 the majority of Bolzoni SpA's share capital is owned by Penta Holding S.p.A. with registered offices in Podenzano, Località I Casoni (Piacenza) with 'holding' function on industrial investments.

Bolzoni S.p.A. is not subject to management and coordinating activities on behalf of companies or bodies and establishes in full autonomy its general and operational strategic orientations.

2. Basis of Preparation and Accounting Principles

2.1 Basis of preparation

Bolzoni S.p.A.'s financial statements have been prepared in compliance with the International Accounting Standards and related interpretations, as approved by the IASB and enacted according to the procedure indicated in article 6 of Ruling (CE) n° 1606 passed on 19 July 2002.

The accounting principles used for this financial statements are those formally approved by the European Union and ruling on December 31st 2013, in addition to the regulations issued to implement art. 9 of the Legislative Decree n° 38/2005. The f igures indicated in the accounting statements are given in euros whereas, in the explanatory notes they given in thousands of euros, except where indicated.

Information has been supplied according to the specific requirements established in CONSOB's resolution n° 15519 dated July 27 2006, CONSOB's re solution n° 15520 dated July 27 2006 and in Circular n° DEM/6064293 dated July 28 2006.

The financial statements as at 31 December 2013 have been drawn up on the basis of the historic cost, modified as required by the accounting standards of reference for the evaluation of certain financial instruments, if necessary.

The company financial statements as at 31 December 2013 have been prepared on the going concern assumption. Indeed the Company has assessed that, despite a difficult economic and financial context, no material uncertainties exist regarding its going concern (as established under paragraph 25 of the IAS 1) also considering the actions already taken during the previous financial years to adjust to the altered levels of demand and the industrial flexibility, the financial availability of credit lines of the Company, the cash flow from the operating activity, the economic and financial forecasts reflected in the long term plan approved by the board of directors for the period 2014-2017.

With reference to the Statements, the following should be noted:

- Balance Sheet: the Company differentiates between non-current assets and liabilities and current assets and liabilities;
- Income Statement: the Company presents a classification of costs according to their nature, which is believed to be more representative of the Company's predominantly commercial and distribution activities;
- Cash Flow Statement: it has been drawn up using the indirect method to determine cash flows produced by the activity during the period;
- Changes in Equity: the Company includes all changes in equity including those deriving from transactions with shareholders (distribution of dividends, share capital increases)

IFRS accounting standards, amendments and interpretations applied from January 2013

- On May 12, 2011, the IASB issued IFRS 13 – Fair value measurement, clarifying the determination of the fair value for the purpose of the financial statement and applying to all situations in which IFRS permit or require a fair value measurement or the presentation of disclosures based on fair value, with some limited exceptions. In addition, this standard requires more detailed information to be disclosed on fair value measurement (fair value hierarchy) compared to IFRS 7 requirements. The standard has been effective prospectively since January 1, 2013. The adoption of this principle had no impact.
- On June 16, 2011, the IASB issued an amendment to IAS 19 – Employee benefits that eliminates the option to defer the recognition of gains and losses, known as the "corridor method", and requires all actuarial gains and losses to be booked to "Other comprehensive income" immediately, so that the full net amount of the provisions for the defined benefits (net of plan assets) is recognised in the consolidated financial position. The amendment further requires any changes in the defined benefit provision and plan assets over the previous period to be subdivided into three components: the cost components of work performed during the reporting period must be recognised in the Income Statement as service costs; net interest costs calculated by applying the appropriate discount rate to the opening net balance of defined benefit provision net of assets must be booked to Income Statement as net financial expenses and the actuarial gains and losses resulting from the remeasurement of assets and liabilities must be booked to "Other comprehensive income". In addition, the return on assets included in net interest costs must be calculated using the discount rate applicable to liabilities and no longer the expected return on the assets. The amendment also introduces the requirement for supplementary disclosures to be provided in the notes. The amendment is applicable retrospectively from financial periods beginning on or after January 1, 2013.
  The effects of the adoption of the new principle on the financial statements is a positive effect on Net Income for Euro 149 thousand after tax (Euro 205 thousand pre-tax) due to actuarial losses booked in Income Statement 2012 that have been recognised in "Other comprehensive income".
- On June 16, 2011, the IASB issued an amendment to IAS 1 – Presentation of Financial Statements requiring entities to group all items presented in "Other comprehensive income" depending on whether they can be reclassified to the Income Statement. The amendment is applicable from financial periods beginning on or after July 1, 2012. The amendment implementation required a new layout of "Other comprehensive income".
- On December 16, 2011, IASB issued certain amendments to IFRS 7 – Financial instruments: Disclosures. The amendments require information about the effect or potential effect of offsetting financial assets and liabilities on an entity's financial position. These amendments are to be applied retrospectively for periods beginning on or after January 1, 2013. The required disclosures should be provided retrospectively. The adoption of these amendments has had no effect on these Company financial statements.
- On May 17, 2012 the IASB published document Annual Improvements to IFRSs: 2009-2011 Cycle, amending standards as part of the annual improvement process, which is designed to make necessary, but not urgent, amendments to IFRSs. Outlined below are those amendments that impact the presentation, recognition and measurement of the items of the financial statements. Those related to changes in new terminology having minimal accounting impacts, or those that concern standards or interpretations not applicable to the Company have been omitted.
  - IAS 1 Presentation of Financial Statements – Comparative information: Clarifies that any additional comparative information provided must be presented in accordance with IAS/IFRS. It also clarifies that when an entity changes an accounting principle or makes adjustments/restatements retrospectively, it must include an opening statement of financial position at the beginning of the comparative period ("third statements of financial position" in the financial statements); related disclosures are not required for such "third statements of financial position", except for the affected items, in the supporting notes.
  - IAS 16 Property, Plant and Equipment – Classification of servicing equipment: clarifies that servicing equipment must be classified under Property, plant and equipment if used during more than one accounting period. Otherwise, they must be classified as inventory.

  - IAS 32 Financial Instruments: Presentation – Taxes relating to distributions to holders of an equity instrument and transaction costs on equity transaction: clarifies that such income taxes are accounted according to IAS 12.
  - IAS 34 Interim Financial Reporting – Total assets for a reportable segment: clarifies that total assets must be disclosed only if such information is regularly provided to the chief operating decision maker of the entity and there has been a material change from the amounts disclosed in the last annual financial statements for the reportable segment.

The proposed amendments are effective for the years beginning on or after January 1, 2013. Early adoption is allowed. The adoption of these amendments has had no effect on measurements and had limited effect in terms of disclosures on the financial statements of the company.

IFRS and IFRIC accounting standards, amendments and interpretations approved by the European Union but not yet applicable and not early adopted by the Company

- On May 12, 2011, IASB issued IFRS 10 – Consolidated Financial Statements that is to supersede SIC-12 Consolidation – Special Purpose Entities (Special Purpose Vehicles) and parts of IAS 27 – Consolidated and Separate Financial Statements, which will be renamed Group Consolidated financial statements and will establish how equity investments are to be accousigninted for in the Group consolidated financial statements. The key changes introduced by this new principle are as follows:
  - Under IFRS 10, all types of entities are to be consolidated according to a single basic principle, i.e. the principle of control. The changes introduced remove the perceived inconsistency between the former IAS 27 (based on control) and SIC 12 (based on the transfer of risk and benefits);
  - A more detailed definition of control has been introduced, based on three elements: (a) power over the investee; (b) exposure, or rights, to variable returns from the investor's involvement with the investee; (c) ability on the part of the investor to use its power over the investee to affect the amount of the investor's returns;
  - for the purpose of determining whether an investor has control over an investee, IFRS 10 requires investor to focus on the activities that significantly affect the investee's return;
  - for the purpose of determining whether an investor has control over an investee, IFRS 10 requires that only substantive rights be considered, i.e. those rights that can be exercised when significant decisions need to be taken concerning the investee;
  - IFRS 10 provides application guidance on evaluating whether control exists in complex situations, such as *de facto* control, potential voting rights, situations in which it is necessary to assess whether the decision-maker is acting as a principal or an agent, etc.

Generally speaking, IFRS 10 application requires significant insight on a certain number of application issues.
This standard is to be applied retrospectively from January 1, 2014. The adoption of this new principle will have no impact on the scope of consolidation of the Group.

- On May 12, 2011, IASB issued IFRS 11 – Joint Arrangements that is to replace IAS 31 – Interests in Joint Ventures and SIC-13 Jointly-controlled Entities – Non-monetary Contributions by Venturers. Without prejudice to the criteria for determining joint control, the new standard provides criteria for the accounting of joint arrangements that focus on the rights and obligations of the arrangement, rather than its legal form and requires a single method to account for interests in jointly-controlled entities in consolidated financial statements, the equity method. According to IFRS 11, the existence of a separate vehicle alone is not sufficient to classify a joint arrangement as a joint venture. This new standard is to be applied retrospectively from January 1, 2014. After this standard was issued, IAS 28 – Investments in Associates was amended to include interests in joint ventures in its scope of application, as of the effective date of the new standard. The adoption of this new principle will have no impact on consolidated financial statements.
- On May 12, 2011, IASB issued IFRS 12 – Disclosure of interests in other entities, a new standard that includes all of the disclosure requirements for subsidiaries, joint arrangements, associates, special purpose entities and other non-consolidated special purpose vehicles to be stated in the consolidated financial statements. This standard is to be applied retrospectively from January 1, 2014.
- On December 16, 2011, the IASB issued certain amendments to IAS 32 – Financial Instruments: Presentation to clarify the application of certain offsetting criteria for financial assets and financial

liabilities in IAS 32. These amendments are to be applied retrospectively for periods beginning on or after January 1, 2014.

- On June 28, 2012, IASB published document *Consolidated Financial Statements, Joint Arrangements, and Disclosure of Interests in Other Entities: Transition Guidance (Amendments to IFRS 10, IFRS 11 and IFRS 12)*. The purpose of this document is to clarify the transition rules in IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements and IFRS 12 Disclosure of Interests in Other Entities. These amendments are to be applied - along with the reference standards - for years beginning on January 1, 2014, unless adopted earlier.
- The amendments to IFRS 10, IFRS 12 and IAS 27 "Investment Entities" issued on October 31, 2012 introduce an exemption from the consolidation of subsidiaries for investment entities, unless the investees provide them with services related to their investment activities. Under these amendments, an investment entity must measure its investment in subsidiaries on a fair value basis. In order to qualify as investment entity, an entity must:
  - obtain funds from one or more investors for the purpose of providing them with professional investment management services;
  - commit to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both;
  - measure and evaluate the performance of substantially all of its investments on a fair value basis.

  These amendments are to be applied - along with the reference standards - for years beginning on January 1, 2014, unless adopted earlier. The adoption of this new principle will have no impact on consolidated financial statements.
- On May 29, 2013, the IASB issued some amendments to IAS 36 Impairment of Assets – Recoverable amount disclosures for non-financial assets. These amendments clarify that the additional disclosures on the recoverable amount of assets (including goodwill) or cash-generating units when such recoverable amount is based on fair value less costs of disposal, are only required for those assets for which an impairment loss was recognised or reversed during the reporting period. These amendments are to be applied retrospectively for financial periods beginning on January 1, 2014.
- On June 27, 2013, the IASB issued some amendments to IAS 39 "Financial instruments: Recognition and measurement – Novation of derivatives and continuation of hedge accounting". These amendments introduce certain exceptions to the hedge accounting requirements in IAS 39 applicable when an existing derivative is required to be replaced with a new derivative for laws or regulations mandate clearing, either directly or indirectly, through a central counterparty (CCP). These amendments are to be applied retrospectively for financial periods beginning on January 1, 2014. Early adoption is allowed.

IFRS accounting standards, amendments and interpretations not yet endorsed by the European Union.

The European Union has not yet completed its endorsement process for the standards and amendments below reported at the date of these financial statements.

- On May 20, 2013, IFRIC interpretation 21 – Levies was issued. The interpretation clarifies when a liability for levies imposed by government agencies should be recognised, both for levies that are accounted for in accordance with IAS 37 – Provisions, Contingent Liabilities and Contingent Assets, and those for which the settlement timing and amount are certain.
- On November 12, 2009, the IASB issued IFRS 9 – Financial instruments: the same standard was amended on October 28, 2010. The standard, applicable retrospectively from January 1, 2015, represents the first part of a process in stages, the aim of which is to entirely replace IAS 39, and introduces new requirements for the classification and measurement of financial assets and financial liabilities. In particular, as regards financial assets, the new standard adopts a single approach based on how an entity manages its financial instruments and the contractual cash flows characteristics of the financial assets, in order to determine its valuation criteria and replacing the many different rules in IAS 39. The most significant effect of the standard regarding the financial liabilities relates to the accounting for changes in fair value attributable to changes in the credit risk of financial liabilities designated as at fair value through profit or loss. According to the new standard, these changes must be recognised in "Other Comprehensive Income" and will no longer be recognised in the Income Statement.

- On November 19, 2013, IASB published document "*IFRS 9 Financial Instruments - Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39*" concerning the new hedge accounting model. The document aims at responding to some criticisms made to IAS 39 requirements for hedge accounting, which are often considered as too stringent and not suitable for reflecting the entities' risk management policies. The main new features are the following:
  - changes to the types of transactions eligible for hedge accounting, namely extending the risks for non-financial assets/liabilities eligible for hedge accounting;
  - change in the way forward contracts and options are recognised when they are included in a hedge accounting transaction in order to decrease Income Statement volatility;
  - changes to effectiveness test by replacing the current method based on 80-125% range with the principle of the "economic relationship" between hedged item and hedging instrument. Moreover, no retrospective effectiveness test of the hedging relationship is required any more;
  - the increased flexibility of the new accounting rules is offset by additional disclosure required on the company risk management activities.

- On December 12, 2013, the IASB issued a set of amendments to IFRSs ("Annual Improvements to IFRSs 2010 - 2012 Cycle" and "Annual Improvements to IFRSs 2011 - 2013 Cycle"); set out below are those applicable to the Company that lead to changes in the presentation, recognition or measurement of financial statements items, excluding those that only regard changes in terminology having a limited accounting effect:
  - IFRS 2 – *Share-based Payment*: the amendment clarifies the definition of 'vesting conditions' in IFRS 2 by separately defining a 'performance condition' and a 'service condition'.
  - IFRS 3 – *Business Combinations*: the amendment clarifies that contingent consideration that is a financial asset or financial liability can only be measured at fair value, with changes in fair value being presented in either profit or loss or other comprehensive income depending on the requirements of IAS 39 (or IFRS 9).
  - IFRS 8 – *Operating Segments- Aggregation of operating segments*: the amendment requires entities to disclose judgements made by management for operating segments identification criteria, including a description of aggregated operating segments and economic indicators considered in determining if such operating segments have "similar economic characteristics".
  - IFRS 8 - *Operating segments – Reconciliation of total of the reportable segments' assets to the entity's assets.* : the amendment requires that reconciliation of total of the reportable segments' assets and total of company assets have to be disclosed only if total of the reportable segment's assets are regularly reviewed by the chief operating decision maker.
  - IFRS 13 – *Fair Value Measurement – Short-term receivables and payables*. Only Basis for conclusions have been modified, clarifying that issuing IFRS 13 and amending IFRS 9 and IAS 39 did not remove the ability to account for current receivables and payables without discounted effects, when impact are not significant.
  - IAS 16 *Property, plant and equipment and IAS 38 Intangible Assets – Revaluation method: proportionate restatement of accumulated depreciation/amortization.*: amendments have eliminated the inconsistencies in determining accumulated depreciation when *Property, plant and equipment* or *Intangible asset*s are revalued. New standards clarify that gross carrying amount was revaluated and the accumulated depreciation/amortization is calculated as the difference between the gross and the net carrying amounts.
  - IAS 24 – *Related Party Disclosures*: the amendment clarifies that an entity providing Key Management Personnel services to the reporting entity is a related party of the reporting entity.

The amendments above are effective for annual periods beginning on or after July 1, 2014, with early application permitted.

On December 12, 2013, the IASB issued a set of amendments to IFRSs ("Annual Improvements to IFRSs 2011 - 2013 Cycle" amending standards as part of the annual process of improvement. The main amendments include:

- IFRS 1 First-time Adoption of International Financial Reporting Standards – Meaning of "effective IFRS". It has been clarified that an IFRS first time adopter entity, as an alternative to the application of a principle currently in force on the date of the first IAS/IFRS financial statements, may opt for early adoption of a new standard intended to replace the principle in force. The option is allowed when the new standard permits early application. It also needs to be applied to the same version of the principle in all periods presented in the first IAS / IFRS financial statements.

- IFRS 3 – *Business Combinations- Scope exception for joint ventures*: the amendment clarifies that paragraph 2(a) of IFRS 3 excludes the formation of all types of joint arrangements as defined in IFRS 11 - Joint Arrangements from the scope of IFRS 3.

- IFRS 13 – *Fair Value*: this amendment clarifies that the portfolio exception included in paragraph 52 of IFRS 13 for measuring the fair value of a group of financial assets and financial liabilities on a net basis applies to all contracts within the scope of IAS 39 or IFRS 9 regardless of whether they meet the definitions of financial assets or financial liabilities as defined in IAS 32.

- IAS 40 *Investment Properties – Interrelationship between IFRS 3 and IAS 40*. Amendments clarifies that IFRS 3 and IAS 40 are not mutually exclusive and that an entity acquiring an investment property should consider whether it meets the definition of a business as defined in IFRS 3 or IAS 40, it needs to consider specific requirements of IFRS 3 or IAS 40.

The amendments above are effective for annual periods beginning on or after July 1, 2014, with early application permitted.

2.2 Judgements and significant accounting estimations

Judgements and accounting estimations

In accordance with IAS/IFRS principles, the preparation of the financial statement requires estimates and assumptions on behalf of the management which have an effect on the value of assets and liabilities and on their disclosure at the date of the statement. The actual results could however differ from these estimates. The estimates are used for measuring depreciation, write-downs and permanent impairments in of value of investments, benefits to employees, taxes and accrual to provisions for contingencies and risks.

Estimates of the Provision for Doubtful Debt are based on the losses expected by the Company. If the current economic and financial crisis were to protract or worsen this could possibly deteriorate the financial conditions of the Company's debtors to a greater extent than the estimation in these financial statements.

Estimates and assumptions are revised from time to time and the effects of each variation can be seen in the Income Statement in the period in which the review is performed.

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Impairment in investments

Investments are subjected to verification for possible impairment at least once a year in all those circumstances where the carrying amount of the investment is less than the corresponding equity method value; this verification requires an estimate of the recoverable amount of the cash generating unit, which is based on the estimate of the current value of cash flows expected from the cash-generated unit and on their discounting on the basis of an appropriate discount rate. Further information is available in Note 5.

Amortization (for assets with a defined useful life)

With the aim of calculating amortizations, the residual useful lives of assets are revised from time to time.

2.3 Accounting principles

Property, plant and equipment

Property, plant and equipment are stated at historic cost, less accumulated depreciation and accumulated impairment in value. Such cost includes costs for replacing part of plant and equipment when that cost is incurred if the recognition criteria are met. Depreciation is calculated on a straight-line basis over the expected useful life generally attributed to the various categories of assets.

Depreciation, which begins when the assets are available for use, is calculated on a straight-line basis over the expected useful life of the assets and taking into account their residual value. The depreciation rates used and which have remained unvaried with respect to the previous financial year, are the following:

Buildings and light constructions	3 %
Plants and equipment	from 10% to 15.5%
Industrial and commercial equipment	from 25% to 30%
Other assets	from 10% to 25%

Land, which normally has an unlimited useful life, is not subject to depreciation.

The carrying amount of property, plant and equipment is revised for possible impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable, according to the established depreciation plan. If an indication of this type exists and in the event that the carrying amount exceeds the expected realizable value, the assets or the cash-generating units to which the assets have been allocated are revalued until they actually reflect their realizable value.

The residual value of the asset, the useful life and the methods applied are reviewed annually and adjusted if necessary at the end of each financial year.

A tangible asset is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) are included in the income statement in the year the asset is derecognized.

Leases

Finance leases, which basically transfer to the Company all the risks and rewards connected to the ownership of the leased item, are capitalized among property, plant and equipment at the inception of the lease, at the fair value of the leased item or, if lower, at the present value of the minimum lease payments. A debt of the same amount is booked in liabilities and is progressively reduced according to the plan for refunding the portions of capital included in the installments.

Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income. The assets are depreciated according to and at the rates indicated in the previous paragraph.

The lease contracts where the lessor substantially retains all the risks and benefits typical of ownership are classified as operating leases.

The initial negotiation costs for operating lease contracts are considered as increasing the cost of the leased asset and are measured over the lease term so that they balance the income generated by the same lease.

Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term.

Intangible assets

Acquired intangible assets are recognized as assets, according to the contents of IAS 38 (Intangible Assets) when it is probable that the use of the asset will generate future economic benefits and when the cost of the asset can be reliably determined.

Intangible assets acquired separately are measured on initial recognition at cost, whereas those acquired in a business combination are measured at fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized

development costs, are not capitalized and expenditure is charged against profits in the year in which the expenditure is incurred. The useful lives of intangibles assets are assessed to be either definite or indefinite. Intangible assets with definite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization methods for an intangible asset with a definite useful life is reviewed at least at each financial year end or even more frequently if necessary. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the income statement in the expense category consistent with the function of the intangible asset.
The Company has not recognized any intangible assets with indefinite lives in the balance sheet.

Research and development costs

Research costs are expensed as incurred. Development costs arising from a particular project are capitalized only when the Company can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of technical, financial or other types of resources to complete development and its capacity to reliably measure the expenditure during the development of the asset and the existence of a market for the products and services resulting from the activity or of their use for internal purposes. The capitalized research costs include only those expenses sustained that can be directly attributed to the development process. Following the initial recognition, the development costs are measured at the cost less any accumulated amortization or loss. Any capitalized costs are amortized over the period in which the project is expected to generate income for the Company.

The carrying amount of development costs is revised for impairment annually, when the asset is not yet in use, or more frequently when an indication of impairment arises during the reporting year.

A summary of the policies applied by the Company to intangibles assets follows:

	Licences and Patents	*Development costs*
Useful lives	Definite	Definite
Method used	Licences amortized on a straight line basis over 3/5 years; Patents amortized on a straight line basis over 10 years;	Amortized over 5 years, on a straight-line basis, corresponding to the period of expected future sales deriving from the related project
Internally generated or acquired	Acquired	Internally generated
Impairment testing/tests on recoverable amounts	Annually or more frequently when there is indication of impairment.	Annually or more frequently when there is indication of impairment.

Gains or losses deriving from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the income statement when the asset is disposed of.

Impairment of non-financial assets

The Company assesses annually at each reporting date whether there is an indication that an asset (intangible assets, property, plant and equipment owned and finance leased assets) may be impaired. In making this assessment of the assets, both internal and external sources of information are considered. With regards to the former (internal sources) the following are considered: obsolescence or the physical deterioration of the asset; if, during the financial year there have been significant changes in the use of the asset; if the economic trend of the business appears to be worse than expected. With regards to external sources however the following are considered: if the market prices of the asset have

significantly dropped; if there are particular technological, market or legislative issues capable of reducing the asset's value.

Regardless of whether there are internal or external indications of impairment loss, goodwill and the other possible intangible assets with indefinite useful life are subjected to impairment testing at least once a year.

In both cases (either the annual check of the carrying amount of goodwill or the other tangible and intangible assets with a definite useful life with indications of possible impairment loss) the Company makes an assessment of the recoverable amount. The recoverable amount is the higher between the fair value of an asset or cash-flow generating unit, net of selling costs, and the value in use; it is determined for each asset, except when the asset does not generate cash flows which are largely independent from those generated by other assets or groups of assets, in which case the Company assesses the recoverable amount of the cash-flow generating unit to which the asset belongs. In particular, as goodwill does not generate cash-flows independently from other assets or groups of assets, impairment testing involves the unit of the group of units to which goodwill has been allocated.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time-value of money and the risks specific to the asset.

For the assessment of value in use, the future financial flows are taken from the company business plans approved by Board of Directors, and which form the best assessment that the Company can make of the expected economic conditions during the period covered by the plan. Projections usually cover a period of three years; the long-term growth rate used for assessing the terminal value of the asset or the unit is normally lower than the average, long-term growth rate of the segment, of the Country or of the benchmark market and, if appropriate, may correspond to zero or can even be negative. The future financial flows are assessed by using the current conditions as benchmark: therefore the estimations do not consider either the benefits arising from future re-organization in which the Company is not yet involved or future investments for improvement or optimization of the asset or unit.

Impairment loss to assets in function (being used) are taken to profit and loss in the cost categories consistent with the function of the asset showing the impairment loss.

At each reporting date the Company also assesses whether there are any indications that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously written-off impairment loss, excluding goodwill, may only be reversed if there have been changes in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In that case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit and loss unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining life. In no case can the goodwill amount previously written-down return to the original.

Investments in subsidiary and associated companies

Investments in subsidiary and associated companies are carried at the adjusted cost when there is an impairment. The Company evaluates, at each financial date of reference, if there is any objective evidence that the investments have been impaired. If such evidence exists the Company establishes the amount of the possible impairment in order to reduce the value. Whenever the Company's possible share of the associated/subsidiary company's losses exceeds the carrying amount of the investment, it is necessary to proceed to the write-off of the investment carrying amount and the portion of further impairment is taken to provision in the liabilities in the event of the Company being obliged to account for it.

Financial assets

Financial assets are initially recognized at the cost – plus the additional charges at acquisition – representing the fair value of equivalent paid. After the initial recognition, financial assets are assessed in relation to their operating destination on the basis of the following outline.

Financial assets held for trading

These are financial assets acquired for the scope of obtaining a profit from short term price fluctuations. After initial recognition, these assets are measured at the fair value and the related profit or loss is charged to the income statement. The derivative financial instruments (interest rate swap, options, forward etc…) are classified as held for trading, unless designated as effective hedging.

Financial assets held to maturity

These are non-derivative financial assets with fixed or determinable payments, and a fixed maturity date, for which the Company has the firm intention and ability to hold until maturity.

After initial recognition, these assets are carried at the amortized cost, using the effective interest rate method.

This cost is calculated as the amount initially recognized less the repayments of capital, plus or minus the accumulated depreciation using the effective interest rate method of any difference between the initially recognized carrying amount and the maturity amount. This calculation includes all the fees and points paid or received between the parties to the contract that are an integral part of the effective interest rate, transaction costs and other premiums or discounts. For investments carried at the amortized cost, gains and losses are recognized in income when the investments are derecognized or impaired, as well as through the amortization.
The financial assets the Company decides to maintain in its portfolio for an indefinite period are not included in this category.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These assets are carried at amortized cost using the effective discount rate. Gains and losses are recognized in income when the loans and receivables are derecognized or impaired, as well as through the amortization.

Available-for-sale financial assets

Includes financial assets not classified in the previous categories. After initial recognition these assets are measured at fair value with gains or losses being recognized as a separate component of equity until they are derecognized or until they are determined to be impaired at which time the cumulative gain or loss previously reported in equity is included in the income statement.
In the case of securities that are actively traded in organized financial markets, the fair value is determined by referring to quoted market bid prices at the close of business on the balance sheet date. For those investments where there is no active market, the fair value is determined by using valuation techniques based on recent transaction prices between independent parties; the current market value of another substantially similar instrument; discounted cash flow analysis; option pricing models.
When the fair value cannot be reliably estimated, investments in other companies are left at cost value.
The Company does not own any available-for-sale financial assets.

Inventories

Inventories are measured at the lower of the purchase or production cost and expected net realizable value.
Costs incurred for bringing each product to its present location and storage are accounted for as follows:

Raw material	– purchase cost based on average weighted cost;
Finished and semi-finished goods	– average production cost for the financial year based on cost of direct materials and labour plus a portion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

The net realizable value is the estimated selling price less estimated costs of completion and the estimated costs necessary to make the sale.
If necessary, provisions have been allocated for write-down of materials, finished products, spare parts and other supplies considered obsolete or with a low turnover rate, considering their expected future use and their realizable value.

Trade and other receivables

Trade receivables, which generally have a 30-120 days' payment terms, are recognized at the original invoice amount less an allowance for any non-collectable amounts to reflect their presumed realizable value. This provision is made when objective elements are present that the Company will not be able to collect the debts. Bad debts are written off when identified.

Cash and cash equivalent

Cash and short term deposits in the balance sheet comprise cash at banks and in hand and short term deposits with an original maturity of three months or less.
For the purpose of the cash flow statement, cash and cash equivalents are represented by cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Interest-bearing loans and borrowings

All loans and borrowings are initially recognized at the fair value of the consideration received less directly attributable transaction costs.
After the initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost, using the effective interest rate method.

Gains and losses are recognized in net profit or loss when the liabilities are derecognized, as well as through the amortization process.

De-recognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Company retains the right to receive cash flows from the asset but has assumed an obligation to pay them in full without material delay to a third party;
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and benefits of the ownership of the assets, or (b) has neither transferred nor retained substantially all the risks and benefits of the asset but has transferred the control of the asset.

Where the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and benefits of the asset nor transferred the control of the asset, the asset is recognized in the Company's balance sheet to the extent of the Company's continuing involvement in the asset itself. The continuing involvement which takes the form of a guarantee over the transferred asset, is measured at the lesser between the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.
Where an existing financial liability is replaced by another from the same lender, on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Impairment of financial assets

The Company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired.

Assets carried at amortized cost

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The amount of the loss shall be recognized in profit or loss.
The Company first assesses whether objective evidence of impairment exists individually, for financial assets that are individually significant, and individually or collectively for the financial assets that are

not individually significant. In the absence of objective evidence of impairment for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.
If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the income statement, to the extent that the carrying amount of the asset does not exceed its amortized cost at the reversal date.

Financial assets carried at cost

If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Retribution scheme under the form of investment in capital (Stock option plans)

As established by IFRS2 – Share based payments, these schemes represent a part of the beneficiary's retribution, the cost being represented by the fair value calculated at the grant date of the option and is recorded in the Income Statement at equal amounts for the length of the period going from the said date and the date the option becomes exercisable and the matching entry is take directly to net equity. Evaluations in fair value subsequent to the assignment date do not have any effect on the initial evaluation.
The Company does not have retribution schemes under the form of investment in capital.

Provisions for contingencies and charges

Provisions for contingencies and charges are recognized when the Company has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Pensions and other post-employment benefits

TFR retirement allowance, calculated in compliance with the laws and current labour contracts, as it is considered a plan with defined benefits in accordance with IAS 19, is determined separately for each company at the end of each financial period using the projected unit credit actuarial valuation method. Revaluations, including actuarial gains and losses, excluding net interest, are immediately recognized in the balance sheet by charging or crediting the retained earnings through the other comprehensive income in the financial year in which they appeared. The actuarial gains and losses are recognized in the income statement, either as labour costs or financial charges depending on the case.

Assets available for sale and liabilities associated with these assets

The non-current assets (or groups of assets and liabilities) are classified as intended for sale if available for immediate sale in the present state, except for recurring transaction conditions for the sale of that type of asset and if the sale is highly probable.

These assets are carried at;

- the lesser between the carrying amount and fair value net of sales costs, any impairment loss is take to profit and loss, unless part of a business combination operation, or else
- at fair value net of sales costs (without the possibility of measuring write-downs during initial recognition), if part of a business combination operation.

In any case the depreciation process is interrupted when the asset is classified as available for sale.
The assets and the liabilities directly connected to a group of assets to be sold are distinctly classified in the income statement, as well as the pertinent reserves of accumulated profits or losses directly taken to equity. The net result of sale operations is indicated in a specific item of the profit and loss statement.

The Company does not have assets available for sale and liabilities associated with these assets.

Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized in the Income Statement.

Sale of goods

Revenue is recognized when the significant risks and rewards linked to the ownership of the goods have passed from the company to the buyer.

Services provided

Revenue from services provided (technical servicing, repairs, other services rendered) is recognized when the service has been provided.

Interest income

Revenue is recognized as interest accrues (using the effective interest method that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset).

Dividends

Dividends are recognized when the shareholders' rights to receive the payment is established.

Government grants

Government grants are recognized where there is reasonable assurance that the grants will be received and all attaching conditions will be complied with. When the grants relate to expense items they are recognized as income over the period necessary to match the grants on a systematic basis to the costs that they are intended to compensate.

Financial charges

Financial charges are taken to income statement when they are incurred.

Income tax

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to taxation authorities. The tax rates and the tax laws used to compute the amount are those that are enacted by the balance sheet date.

Deferred tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.
Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the same time of the transaction, affects neither the accounting profit nor taxable profit or loss. Deferred income tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent of the probability that taxable profit will be available and against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilised, excepting where the deferred income tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
The carrying amount of deferred income tax assets is revised at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.
Income tax related to items recognized directly in equity is recognized directly in equity and not in the income statement.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable rights exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value Added Tax

Revenues, expenses and assets are recognized net of the amount of VAT except where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority in which case VAT is recognized as part of the cost of acquisition of the asset or part of the expense item taken to the income statement. The net amount of VAT that can be recovered from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Derivative financial instruments and hedging

Derivative financial instruments are recognised at fair value and variations to fair value are taken to income statement when they do not qualify as hedge accounting or because of the type of instrument, or following the Company's decision to not perform the so-called effectiveness test. Derivative financial instruments are classified as hedge instruments when the relation between the derivative and the hedged object is formally documented and the effectiveness of hedging, periodically verified, is recognised according to IAS 39. When the hedging derivatives cover the risk of variations in cash flow of the hedged elements (Cash Flow Hedge) the effective portion of the fair value variations of the derivatives is directly taken to net equity whereas the ineffective portion is directly taken to income statement. The amounts recognised directly in net equity are reflected in the income statement coherently to the economic effects produced by the hedged element. When however the derivatives cover the risk of variations in the fair value of hedged elements (Fair Vale Hedge) the fair value variation of the derivatives are taken directly to income statement; coherently, the hedged instruments are suitable for reflecting the fair value variations associated with the hedged risk.

Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into euros (the operating currency) at the exchange rate ruling at the balance sheet date. All exchange rate differences are taken to the income statement. The non-monetary items assessed in foreign currencies at the historical cost are translated using the exchange rate ruling on the date the transaction is registered. No monetary items carried in foreign currencies at the fair value are translated using the exchange rate ruling on the date the value is determined.

2.4 Segment information

The Company operates in a single segment made up of attachments for fork lift trucks.

3. Property, plant and equipment

	01.01.13	Addition	Deprec.	Decrease (1)	31.12.13
Land	721	-	-	-	721
Buildings	6,952	-	-	(2)	6,950

(1): Due to sales

* During the financial year 2013 the amount has been entirely paid except for 153 thousand euros (Note 20). In the same year 203 thousand euros have been paid for investments made in previous years.

The value of Property, Plant and Machinery generated internally, entirely attributed to item ‘Plant and Machinery’, amounts to 207 thousand euros (2012: 70 thousand euros) and is represented by raw material, semi-finished products and personnel costs.
The investments made during 2013 in Plant and Machinery refer to the purchase of machine tools and equipment necessary for a continual modernization process aimed at increasing the company’s productivity and efficiency.
It should be noted that the net carrying amount of the fixed assets acquired during previous financial years through lease contracts have been cancelled following the completion of the amortization plan.

4. Intangible fixed assets

	01.01.13	Addition	Other variations	31.12.13
Development costs	1,733	345	-	2,078
Patent rights	108	-	-	108
Licences	3,323	105	-	3,428
Others	208	-	-	208
Assets under construction	6	-	(6)	-
Gross carrying amount of Intangible Fixed Assets	**5,378**	**450**	**(6)**	**5,822**
Development costs	(1,008)	(170)	-	(1,178)
Patent rights	(107)	(1)	-	(108)
Licences	(2,973)	(198)	-	(3,171)
Others	(201)	-	-	(201)
Accumulated amortization for Intangible Fixed Assets	**(4,289)**	**(369)**	**-**	**(4,658)**
Development costs	725	175	-	900
Patent rights	1	(1)	-	-
Licences	350	(93)	-	257
Others	7	-	-	7
Assets under construction	6	-	(6)	-
Net Carrying Amount of Intangible Fixed Assets	**1,089**	**81**	**(6)**	**1,164**

The value of intangible fixed assets generated internally and capitalized in 2013, and attributed entirely to the item 'Development costs' amounts to 345 thousand euros and includes related personnel costs. These projects mainly refer to the development of new technical solutions for existing products.
As at 31 December 2013 development costs included 432 thousand euros referring to projects whose amortization has not yet started as they are not yet available for use.
The item 'Licences' essentially includes the software purchased externally by the Company.

5. Investments in subsidiaries

The Company has the following investments in subsidiary companies:

	Location	% of invest.	Type of ownership	31.12.12	Incr. Decr.	Write down	31.12.13
Bolzoni Auramo Inc.	USA	100	Direct	6,505	1,532	-	8,037

Bolzoni Auramo Wuxi (3)	China	100	Indirect	-	-	-	-
TOTAL				**43,518**	**3,879**	**787**	**46,610**

(1) % owned by Hans H Meyer GmbH for a value of 19,550 €.
(2) % owned by Bolzoni Holding Hong Kong for a value of HK$ 21,980,721
(3) % owned by Bolzoni Holding Hong Kong for a value of HK$ 77,521.956.

The increased cost of investment in Bolzoni Auramo Inc, refers to the deposit in the capital increase account obtained through the conversion of trade receivables.
The increased cost of investment in Bolzoni Auramo S.l. is due to the deposit in the capital increase account obtained by bank transfer.
The increased cost of investment in Bolzoni Auramo S.r.l. is due to the deposit in the capital increase account obtained by bank transfer.
In view of the decision to wind up Bolzoni Auramo S.r.l. the investment amounting to 287 thousand euros has been completely written down.
The increased cost of investment in Bolzoni Auramo Pty refers to the deposit in capital account obtained through the conversion of financial receivables.
The increased cost of the investment in Bolzoni Italia S.r.l. refers to the deposit in capital account obtained by bank transfer.
During the financial year 2013 a share capital increase was made for Bolzoni Holding Hong Kong subscribed for the stake owned, and obtained by bank transfer.

Below is a comparison between the carrying amount and the corresponding value determined with the equity method:

	Investment value	Net Equity method	Difference
Bolzoni Auramo Inc.	8,037	2,350	(5,687)
Bolzoni Ltd	430	385	(45)
Bolzoni Auramo S.l.	2,633	54	(2,579)
Bolzoni Italia S.r.l.	908	96	(812)
Auramo Oy	13,119	16,392	3,273
Bolzoni Auramo Pty	1,460	(132)	(1,592)
Hans H. Meyer GmbH	8,826	8,693	(133)
Bolzoni Holding Hong Kong	8,618	8,080	(538)
Bolzoni Auramo GmbH	589	642	53
Bolzoni Auramo S.r.l.	-	6	6
Bolzoni Auramo Shanghai	720	1,070	350
Bolzoni Sarl	376	1,128	752
Bolzoni Auramo BV	-	219	219
Bolzoni Auramo Canada Ltd	122	500	378
Bolzoni Auramo Polska	50	173	123
Bolzoni Auramo AB	722	1,420	698

As for the previous financial year impairment tests were performed on the companies where negative differences emerged between the carrying amount of the investment and the corresponding value calculated with the equity method. In particular, impairment tests were performed on the basis of the 4 years Business Plan approved by the Board of Directors. With reference to the impairment tests it should be noted that the value in use was established using the Discounted Cash Flow method in the unlevered version. The evaluations was made on going concern basis. The tax rates used for these tests are those currently applicable.

The following assumptions have also been considered:

- the calculation of Terminal Value has been made on the basis of an estimate of the expected net operating income over a period corresponding to the estimated useful life of the activity of the company under evaluation, on the assumption of a ‘g’ growth rate ranging from 0 to 1% depending on the country of reference and, in any case, , lower than the expected growth rate of the sector;
- the discount rates (WACC) applied to projections of cash flows range from 6.53% and 9.30%. These rates, from which tax effects have been deducted, have been determined, in line with those used in the previous financial year. The variability of these rates between one investment and another mainly depends on the market risk premium related to the market in which the investments operate.

The above-mentioned impairment tests have determined the need to write-down the investments held in Bolzoni Auramo S.l. for the amount of 350 thousand euros and Bolzoni Italia S.r.l. for the amount of 150 thousand euros.

Moreover, at 31 December 2013 a sensitivity analysis was performed on the recoverable amount of investments in the main Group companies, based on the assumption of 0.50% and 1.00% change in WACC whereas it is not applicable on the ‘g’ as it is already zero for the companies under examination. The only subsidiaries where the sensitivity analysis has highlighted an impairment indicator, following the different WACC used, are Bolzoni Auramo S.l. (269 thousand euros with a 1% variation in WACC) and Bolzoni Italia S.r.l. (142 thousand euros with a 1% variation in WACC); for these subsidiaries the observance of the business plans must be carefully monitored over the next financial years.

6. Investments in associated companies

The Company does not hold investments in associated companies.

7. Financial receivables and other financial assets (non-current)

	31.12.2012	Increases	Decreases	31.12.2013
Guarantee deposits	15	1	-	16
Other financial assets	164	-	82	82
Total	**179**	**1**	**82**	**98**

The amount of 82 thousand euros refers to collection notices related to the appeal made to the *Commissione Tributaria Provinciale* (Tax Commission for the Province) described in Note 31.

None of the credits have a due date of more than 5 years.

8. Taxation

8.1 Deferred tax

Deferred tax at 31st December 2013 and 2012 is as follows:

	Balance Sheet		Variation
	2013	2012	2013
Deferred tax liability			
Tax adjustment on inventory	8	46	(38)
Capitalization of internal costs	27	39	(12)
Derivative and TFR value accounted for directly to equity	60	-	60*
Sundry	12	10	2
	107	**95**	12
Deferred tax assets			
Inventory devaluation	74	86	12
Exchange rate fluctuations	45	39	(6)
Derivative value accounted for directly to equity	20	33	13*
Provision accrual	72	70	(2)
Sundry	9	8	(1)
	220	**236**	16
Deferred tax income			**28**

* the variations are reflected solely in the comprehensive income statement and not in the income statement.

It should be noted that there are no further temporary differences on assets other than the above. All deferred tax assets are therefore booked in the financial statements.

8.2 Income tax

The major components of income tax for the years which ended 31st December 2013 and 2012 are:

Income statement	2013	2012
Current income tax		
Current income tax charge	736	898
Tax for previous financial years	66	5
Recovery of IRES on IRAP	-	(412)
Deferred income tax		
Relating to recognition and reversal of temporary differences	(45)	(156)
Income tax	**757**	**335**

A reconciliation between effective tax charge and the theoretical tax charge, calculated as product of accounting profit multiplied by the domestic tax rate for the years ended 31st December 2013 and 2012, is the following:

IRES/Income tax	2013		2012	
	Amount	Rate	Amount	Rate
Applicable ordinary tax rate		27.50%		27.50%
Result before tax	1,810		2,156	
Theoretical tax charge	**498**		**593**	
Plus variations:				
Tax free or non-taxable income	9		10	
Other plus variations for IAS purposes	184		125	
Exchange rate fluctuations	165		491	
Company cars	139		96	
Depreciation of equity participations	787		203	
Non-deductible costs	213		278	
Minus variations				
Tax losses carried forward	-		-	
Other minus variations for IAS purposes	-		-	
Deductible IRAP	(352)		(366)	
Exchange rate fluctuations	(141)		-	
Dividends from subsidiaries	(1,400)		(1,022)	
Other minus variations	(191)		(197)	
Taxable amount	**1,223**		**1,774**	
IRES income tax	**336**	**18.56%**	**488**	**22.63%**

IRAP	2013		2012	
	Amount	Rate	Amount	Rate
Applicable ordinary tax rate		3.90%		3.90%
Result before tax	1,810		2,156	
Theoretical tax charge	**71**		**84**	
Plus variations:				
Personnel costs	6,861		6,465	
Other plus variations	1,684		1,899	
Minus variations:				
Other minus variations	(132)		-	
Taxable amount	**10,223**		**10,520**	
IRAP income tax	**399**	**22.04%**	**410**	**19.03%**

9. Inventory

	2013	2012
Raw material	1,261	1,232
Obsolescence provision for raw material	(50)	(57)
Net raw materials	**1,211**	**1,175**
Semi-finished products	3,216	3,278
Obsolescence provision for semi-finished products	(129)	(153)
Net semi-finished products	**3,087**	**3,125**
Finished products	1,394	1,385
Obsolescence provision for finished products	(56)	(65)
Net finished products	**1,338**	**1,320**
Total inventory	**5,636**	**5,620**

Below are the variations in the stock obsolescence provision during the periods under consideration:

	31.12.2012	Increase	Decrease	31.12.2013
Obsolescence provision for raw material	57	-	7	50
Obsolescence.provision for semi-finished products	153	-	24	129
Obsolescence provision for finished products	65	-	9	56
Total	**275**	**-**	**40**	**235**

The obsolescence provision is basically in line with the result of the previous year also considering a substantial alignment of inventory with respect to the previous financial year.

10. Trade receivables (current)

	2013	2012
Trade receivables	4,952	4,807
Bills subject to collection	3,503	3,412
Bad debt provision	(118)	(197)
Total third party receivables	***8,337***	***8,022***
Receivables from subsidiaries	6,410	8,796
Receivables from associates	37	134
Total trade receivables	**14,784**	**16,952**

The drop in trade receivables mainly refers to the decrease in receivables with the group companies.

Below the trade receivables are divided according to due date:

	2013	2012
Receivables not yet due	12,042	11,633
Receivables 30 days overdue	1,829	2,394
Receivables 60 days overdue	81	710
Receivables 90 days overdue	25	826
Receivables more than 90 days overdue	807	1,389
Total trade receivables	**14,784**	**16,952**

Below are the variations to the bad debt provision:

	2013	2012
Bad debt provision on 01.01	**197**	**156**
Accruals for the year	5	42
Write-off for the year	84	1
Bad debt provision on 31.12.	**118**	**197**

For the terms and the conditions concerning related party receivables, refer to note 31.

Trade receivables are non-interest bearing and are generally on a 30-120 days' terms. We would like to point out that these amounts, including the overdue receivables, are covered by a credit insurance for 90% of their nominal value therefore the overdue receivables do not represent a probable risk of not being collected.

Below are details of receivables related to each subsidiary and associated company:

	31.12.2013	31.12.2012	Variations
Auramo Oy	42	86	(44)
Bolzoni Auramo AB	40	37	3
Bolzoni Auramo GmbH	119	228	(109)
Bolzoni Auramo Pty Ltd	385	1,243	(858)
Bolzoni Auramo Polska	190	222	(32)
Bolzoni Auramo Canada Ltd	187	98	89
Bolzoni Auramo SL	429	547	(118)
Bolzoni Auramo Inc.	1,835	3,705	(1,870)
Bolzoni Ltd	247	317	(70)
Bolzoni Auramo S.r.l.	-	254	(254)
Bolzoni Sarl	693	778	(85)
Bolzoni Auramo BV	105	100	5
Bolzoni Auramo Shanghai	245	388	(143)
Hans H Meyer GmbH	377	314	63
LLC "Hans H Meyer OOO"	53	58	(5)
Bolzoni Italia S.r.l.	491	277	214
Bolzoni Auramo Wuxi	905	144	761
Bolzoni Huaxin	67	-	67
Auramo South Africa (associated company)	37	134	(97)
Total	**6,447**	**8,930**	**(2,483)**

The amount of receivables related to subsidiaries and associates has decreased compared to the previous year mainly due to the collection of receivable from subsidiary Bolzoni Auramo Inc.

11. Tax receivables

	2013	2012
IRES tax receivables	147	-
IRAP tax receivables	21	5
IRES tax receivables on recovery of IRAP	413	413
Other tax receivables	39	47
Total	**620**	**465**

The amount for 'IRES tax receivables on recovery of IRAP' mainly refers to the credit resulting from the request for refund thanks to the acknowledged right to IRAP deduction, amounting to 413 thousand euros, concerning years 2007-2011.

12. Other receivables

	2013	2012
VAT receivables	36	192
Advance to suppliers	16	453
Prepaid expenses	45	40
Subsidiary dividend receivables	196	-
Sundry	70	333
Total	**363**	**1,018**

The item 'Advance to suppliers' in 2012 mainly included an advance to the associated company XinHuaxin which was collected in 2013.
In 2012 the 'Sundry' item included a receivable with the subsidiary Bolzoni Auramo Pty, the result of the sale of investment in Eurolift Pty and collected during 2013.
The Item 'subsidiary dividend receivables' includes dividends to be collected from subsidiaries Bolzoni Auramo AB, Bolzoni Sarl and Bolzoni Auramo Polska.

13. Financial receivables and other financial assets

Details on the residual amount of interest-bearing loans (Euribor 3 months + 1.6% spread), given out to the single subsidiaries, maturing on 31.12.2014 and renewable, are provided below:

Subsidiaries	*31.12.2013*	*31.12.2012*
Bolzoni Auramo Inc.	1,450	-
Hans H. Meyer GmbH	1,000	1,000
Bolzoni Holding Hong Kong	22	-
Bolzoni Auramo Canada Ltd	200	100
Bolzoni Auramo Pty	2,400	-
Bolzoni Italia S.r.l.	100	100
Total	**5,172**	**1,200**

The loans were given in euros except for loans to Bolzoni Auramo Inc and Bolzoni Holding Hong Kong given in US dollars.

Financial ereceivables from Bolzoni Auramo Inc and Bolzoni Auramo Pty have increased since last year due to new loans given.

14. Cash and cash equivalents

	2013	2012
Cash in hand	11	13
Bank deposits	5,970	1,023
Total	**5,981**	**1,036**

Bank deposits have a variable interest rate.

For the purpose of the cash flow statement, cash and cash equivalents comprise the following at 31 December:

	2013	2012
Cash in hand and bank deposits	5,981	1,036
Bank overdrafts and advance on notes to be collected (note 16)	(1,451)	(1,699)
Total	**4,530**	**(663)**

15. Share capital and reserves

	2013	2012
Ordinary shares 0.25 euro each	25,993,915	25,993,915

During the financial year 2013 there have been no variations to share capital.

For details regarding equity changes please refer to the ‘Statement of changes in equity’.

	Amount	Possible use	Available Portion	Tax restraints	Use for loss hedging	Other uses
A) Share capital	6,498				None	None
B) Share premium reserve	17,543	A – B - C			None	None
C) Legal reserve	1,462	B			None	None
C) Other reserves	11,323	A – B - C			None	Distribution of dividends
C) IAS reserves	(103)	A – B - C			None	Cash flow hedge & TFR
D) Revaluation reserve	2,330	A – B - C			None	None
Total	**39,260**					
Year’s profit	**1,053**					
Total equity	**40,313**					

Key: A) share capital increase, B) hedging against losses, C) distribution to shareholders.

16. Interest bearing loans and borrowings

		Actual interest rate %	Maturity	31.12.2013	31.12.2012
Short term					
Bank overdrafts			On request	5	11
Trade advances			30-90 days	946	1,299
Foreign advances				500	400
Subsidiary companies	(1)	Euribor + 1.60		3,975	5,425
€ 1,500,000 unsecured loan	(2)	Euribor + 0.25	2013	-	94
€ 10,000,000 unsecured loan	(3)	Euribor + 1.30	2014	2,493	2,461
€ 5,000,000 unsecured loan	(4)	Euribor + 1.50	2014	1,633	-
€ 6,000,000 mortgage loans	(5)	Euribor + 1.50	2014	664	652
€ 2,000,000 unsecured loan	(6)	Euribor + 1.60	2014	670	1,330
€ 2,000,000 mortgage loans	(7)	Euribor + 2.30	2014	691	663
€ 9,000,000 unsecured loans	(8)	Euribor + 2.50	2014	8,912	-
				20,489	**12,335**
Medium/long term					
€ 6,000,000 unsecured loan	(9)	Euribor + 1.50	2013	-	2,000
€ 2,500,000 unsecured loan	(6)	Euribor + 1.60	2014	-	670
€ 2,000,000 unsecured loan	(3)	Euribor + 1.30	2014	-	499
€ 2,000,000 unsecured loan	(7)	Euribor + 2.30	2014	-	691
€ 2,000,000 unsecured loan	(3)	Euribor + 1.30	2015	250	749
€ 5,000,000 unsecured loan	(4)	Euribor + 1.50	2016	3,084	-
€ 810,000 unsecured loan	(10)	Euribor + 7.00	2016	810	-
€ 6,000,000 unsecured loan	(2)	Euribor + 1.30	2016	2,299	3,793
€ 6,000,000 unsecured loan	(11)	Euribor + 2.00	2017	1,986	-
€ 6,000,000 mortgage loans	(5)	Euribor + 1.50	2019	3,205	3,870
				11,634	**12,272**

Unsecured loans from subsidiary companies (1)
The loans are unsecured and repayable.
1,500,000 euro bank loan (2)
The loan was not secured and was paid back at due date.
10,000,000 euro bank loans (3)
The loans are unsecured and repayable in quarterly instalments.
5,000,000 euro bank loans (4)
The loans are unsecured and repayable in quarterly instalments.
6,000,000 euro mortgage loans (5)
The two loans are secured by a second degree mortgage on the property in Podenzano, are repayable in half yearly instalments at fixed principal value.
2,000,000 euro unsecured loan (6)
The loan is unsecured and repayable in quarterly instalments.
2,000,000 euro unsecured loan (7)
The loan is unsecured and repayable in quarterly instalments.
9,000,000 euro unsecured loan (8)
The loan is unsecured and repayable in half yearly instalments.
2,000,000 euro unsecured bank loan (9)
The loan was not secured and was paid back at due date.
810,000 euro unsecured loan (10)
The loan is secured by a surety amounting to 340,000 euros and is repayable on maturity.
6,000,000 euro unsecured loan (11)
The loan, of which 2,000,000 euros have been given at 31.12.2013, is unsecured and repayable in half-yearly instalments.

Some loans are subject to the observance of the following covenants calculated (based on the consolidated financial statements):

Loan	Covenants	2013	Limit
19.000 €/000	Net financial debts/Net equity	0.81	< 1.50
19.000 €/000	Net financial debts/Gross operating margin	3.53	< 3.50

As indicated in the above table, one of the two covenants has not been observed. Consequently, a 9 million loan has been reclassified as short-term. On March 10, 2014 the Bank issued a letter authorizing the covenant to be overrun for year 2013, without requiring any variations to contractual terms or advance pay-back.

The non-observance of both covenants would give the other party the right to declare forfeited the company's benefit to the term and could therefore result in the possible early repayment of the loan (residual debt of 5.9 million, 2.7 million of which due in 2014 and therefore already included in the short term loans).

Net financial position	*31.12.2013*	*31.12.2012*	*Variation*
A. Cash on hand	11	13	(2)
B. Current bank deposits	*5,970*	1,023	4,947
- *of which related to Intesa Sanpaolo*	-	*477*	*(477)*
D. CASH AND CASH EQUIVALENTS	**5,981**	**1,036**	**4,945**
E. Financial receivables	5,172	1,200	3,972
F. Current bank debts	(1,515)	(1,710)	195
G. Current part of non-current debt	(14,999)	(5,200)	(9,799)
- *of which related to Intesa Sanpaolo*	-	*(1,094)*	*1,094*
H. Other current financial debts	(3,975)	(5,425)	1,450
I. CURRENT FINANCIAL DEBTS	**(15,317)**	**(11,135)**	**(4,182)**
J. CURRENT NET FINANCIAL POSITION	**(9,336)**	**(10,099)**	**763**
N. NON-CURRENT NET FINANCIAL POSITION	**(12,044)**	**(12,272)**	**215**
- *of which related to Intesa Sanpaolo*	-	*(1,250)*	*1,250*
O. NET FINANCIAL POSITION	**(21,380)**	**(22,371)**	**978**
- of which related to Intesa Sanpaolo	**-**	***(1,867)***	***1,867***

Net financial position has improved from 22.371 thousand euros at 31.12.2012 to 21,380 thousand euros at 31.12.2013 mainly thanks to the careful management of working capital.

17. Employee benefits - T.F.R. retirement allowance

Below are the variations to this fund:

	2013	*2012*
T.F.R. retirement allowance fund at 01.01	**2,207**	**2,031**
Current service cost	610	561
Interest cost	58	79
Actuarial gain /(losses)	(204)	205
Benefit paid/transfer of funds	(692)	(669)
T.F.R. retirement allowance at 31.12	**1,979**	**2,207**

Following the amendment of TFR retirement allowance introduced by the 2007 Budget Law, Bolzoni S.p.A. will no longer need to make a provision for employees but will be obliged to pay the amount matured to the INPS Treasury Fund unless otherwise allocated by the employee. Thus, the TFR allowance matured as at December 31 2006 must be discounted back without taking in account future economic career developments of the employees whereas, the amounts maturing from January 1st 2007 will be treated as defined contribution plan. In view of the new Italian regulation scheme, an evaluation was made by a registered actuary on the TFR accrued as at December 31st 2013.

To determine liabilities the actuary has used the method called Projected Unit Credit Cost which can be broken down into the following phases:

- on the basis of a series of possible financial solutions (for example, increase in the cost of life), estimates have been made regarding the possible future benefits which could be paid to each employee included in the programme in the event of retirement, death, disablement, resignation etc.

Furthermore,

- the current average value of future benefits paid has been calculated at the evaluation date, on the basis of annual interest rate adopted and the possibilities of each sum actually being paid out;
- the company's liability has been defined by identifying the portion of the current average value for the future sum paid referring to service matured in the company by the employee at the evaluation date;
- based on the liability determined at the previous point, and the reserve allocated in the financial statements in accordance with Italian civil laws, the reserve considered as being valid for the IAS purposes has been identified.

Below are details of possible scenarios:

Demographic theories	*Executives*	*Non Executives*
Probability of death	Mortality rate tables(named RG48) for the Italian population as measured by the General State Accounting Office	Mortality rate tables (named RG48) for the Italian population as measured by the General State Accounting Office.
Probability of disablement	Tables, divided according to sex, adopted in the INPS model for projections up to 2014	Tables, divided according to sex, adopted in the INPS model for projections up to 2014
Probability of resignation	7.5% in each year	7.5% in each year
Probability of retirement	Achievement of the first of the pension requirements valid for Mandatory General Insurance	Achievement of the first of the pension requirements valid for Mandatory General Insurance
Probability for an employee of: -receiving advance payment of 70% of the accrued retirement allowance at the start of the year	3.0% in each year	3.0% in each year
Financial theories	*Executives*	*Non Executives*
Increase in the cost of life	2.00% per annum	2.00% per annum
Discounting rate	3.15% per annum	3.15% per annum
Increase in TFR retirement allowance	3.00% per annum	3.00% per annum

It should be noted that the Company has taken, as reference, the discount index iBoxx Eurozone Corporates AA 10+ at the reporting date. Following the modifications introduced to IAS 19, as of January 1, 2013 actuarial gains and losses deriving from the redetermination of liabilities are taken to 'Other components of the comprehensive income statement' and booked in the Company's net equity under item 'Retained earnings'.

18. Provision

	31.12.12	*Incr.*	*Decr.*	*31.12.13*	*Within 12 months*	*After 12 months*
Agents' termination indemnities provision	180	-	-	180	-	180
Product Warranty provision	86	92	(86)	92	92	-
Total	**266**	**92**	**(86)**	**272**	**92**	**180**

Agents' termination benefit provision

The aim of this provision is to deal with the related liability matured by agents.

Product warranty provision

This provision has been accrued to meet charges in connection with product warranties sold during the financial year and which are expected to be incurred the following year. The determination of the necessary provision is based on past experience, staff costs and costs of material used for warranty servicing, indicating the average impact of these costs incurred with respect to the pertinent turnover.

19. Liabilities related to derivate instruments

This item represents the fair value of the derivative contracts on interest rates. Of these, two contracts have all the characteristics for classification as hedging according to the related standards. For these contracts recognition is directly to net equity (cash flow hedge reserve, see variations to net equity) whereas for the other contracts the fair value is accounted for in the income statement.

Below are the main figures of the derivative contracts:

		31.12.2013			31.12.2012		
	Maturity	Notional	Positive Fair value	Negative Fair value	Notional	Positive Fair value	Negative Fair value
IRS accounted for according to cash flow hedging	2016	2,600	-	75	3,196	-	120
IRS which do not reflect the requirements established by IAS 39 to qualify as hedging	2016	8,000	-	314	8,000	-	456
IRS accounted for according to cash flow hedging	2017	9,000	13	-	-	-	-
IRS which do not reflect the requirements established by IAS 39 to qualify as hedging	2017	3,000	-	35	-	-	-
Total derivatives for hedging against interest rate risk		**22,600**	**13**	**424**	**11,196**	**-**	**576**

20. Trade payables

	2013	2012
Domestic suppliers	13,078	11,753
Foreign suppliers	632	631
Payables towards subsidiaries	771	902
	14,481	**13,286**

Trade payables are non-interest bearing and are normally settled on a 90 day basis.
The increase in trade payables is due to the different time distribution of purchases.
For terms and conditions for related parties, see Note 32.
Domestic supplier payables at 31 December 2013 include 153 thousand euros related to investments in tangible and intangible fixed assets made during the second semester of the year (Notes 3 and 4).

Below are details of payables related to the single subsidiary companies:

	31.12.2013	31.12.2012	Variations
Auramo Oy	202	182	20
Bolzoni Auramo AB	2	5	(3)
Bolzoni Auramo GmbH	2	2	-
Bolzoni Sarl	18	14	4
Bolzoni Auramo SL	2	10	(8)
Bolzoni Auramo S.r.l.	-	3	(3)
Bolzoni Auramo BV	-	5	(5)
Bolzoni Ltd	23	21	2
Bolzoni Huaxin	126	-	126
Bolzoni Auramo Inc	1	3	(2)
Bolzoni Auramo Canada Ltd	1	3	(2)
Bolzoni Auramo Shanghai	-	7	(7)
Hans H. Meyer GmbH	133	293	(160)
LLC “Hans H. Meyer OOO”	9	17	(8)
Bolzoni Italia S.r.l.	252	337	(85)
Total	**771**	**902**	**(131)**

21. Other payables

	2013	2012
Payables to employees for wages	584	554
Payables to employees for matured but untaken holidays	123	107
Social security payables	648	588
Tax payables for employee wages	487	407
Other accrued expenses	97	20
Other short term liabilities	108	110
Sundry payables	26	26
Total	**2,073**	**1,812**

22. Payables for income taxes

	2013	2012
Debt for income tax	-	245
Total	**-**	**245**
- within the financial period	-	*245*
- after the financial period	-	-

In the financial statements at 31 December 2013 there are no debts for income tax for the year as advance payments are more than taxes calculated.

INCOME STATEMENT

23. Revenue

Below is a break-down of revenue according to geographic area.

2012	Europe	North America	R.O.W.	Total
Revenue	51,459	5,992	4,875	62,326

2013	Europe	North America	R.O.W.	Total
Revenue	50,716	6,245	5,549	62,510

Compared to the previous year, revenue in Europe has decreased by 1.4%, compensated by a 4.2% increase in the U.S.A. and a 13.8% rise in the rest of the world. It should be noted that turnover in Italy in 2013 amounts to 12.2 million euros an increase of 0.1% compared to the previous year.

24. Other revenue

	2013	2012
Sundry income	42	97
Gains on disposal	23	18
Other operating income	11	14
Total	**76**	**129**

25. Costs for raw material and consumable supplies

	2013	2012
Raw material	4,449	4,704
Commercial goods	2,167	2,263
Semi-finished products	23,673	23,720
Other purchases for production	1,867	1,818
Sundry purchases	112	96
Accessory expenses	96	85
Finished products	3,986	3,252
Total	**36,350**	**35,938**

Higher costs for commercial goods and consumable supplies is mainly the result of increased sales volumes.

26. Service costs

	2013	2012
Industrial services	5,181	5,636
Commercial services	2,313	2,213
General services	2,075	2,072
Costs related to use of third party assets	310	335
Total	**9,879**	**10,256**

Industrial service costs have decreased compared to the previous year, mainly due to the increase in sales volumes.

27. Personnel costs

	2013	2012
Wages and salaries	8,121	7,770
Social security	2,836	2,621
TFR retirement allowance (note 17)	605	356
Sundry costs	73	182
Total	**11,635**	**10,929**

The increase in personnel costs is the result of new staff additions and contractual wage increases.

The number of employees in Bolzoni S.p.A. at 31 December 2013 are**:**

	31.12.2013	31.12.2012	Variation
Top Managers	7	5	2
First-line managers	6	7	(1)
White collar	86	84	2
Blue collar	135	128	7
Total	**234**	**224**	**10**

28. Other operating costs

	2013	2012
Tax and duty	84	39
Losses on sale of fixed assets	19	6
Sundry	160	202
Total	**263**	**247**

The item ‘Sundry’ includes recorded costs of administrative and legal nature, association fees and donations.

29. Financial income and charges

	2013	2012
Financial expenses	889	1,171
Financial income	(1,538)	(1,121)
Gains and losses from exchange rates	45	25
Net financial income (expenses)	**(604)**	**75**

Compared to the previous financial year, there has been a substantial variation in net financial income/expenses mainly due to the higher dividends paid out by the subsidiary companies.

29.1 Financial charges	2013	2012
Interest on short-term payables (overdrafts and credit disinvestment)	37	75
Interest on medium/long term loan payables	593	523
Charges other than above	259	573
Total	**889**	**1,171**

The increase in interest on medium/long term loans is the result of the increase in debts towards financing bodies and the increase in spreads applied by banks.

The decrease in other charges is mainly due to the assessment of derivatives.

29.2 Financial income	2013	2012
Interest income from customers	34	44
Interest income from financial assets	40	2
Dividends from subsidiaries	1,464	1,075
	1,538	**1,121**

Dividends were paid out by the subsidiaries Bolzoni S.a.r.l. (210 thousand euros), Bolzoni Auramo Polska (35 thousand euros), Bolzoni Auramo AB (281 thousand euros), Auramo OY (900 thousand euros) and Bolzoni Auramo BV (39 thousand euros).

29.3 Currency exchange rate gains and losses	2013	2012
Currency exchange rate gains	467	450
Currency exchange rate losses	(512)	(475)
	(45)	**(25)**

Variations are essentially due to effects of fluctuations in the exchange rates of the US and GB currencies during 2013. These variations have produced effects both on the result of exchange rate handling and on the adjustment of items in foreign currencies to balance sheet date exchange rates.

30. Dividends

During the course of the financial year 2013 dividends for the amount of €1,299,695.75 (2012: €1,039,756.60) were approved and paid out. The proposal regarding dividends for approval by the Shareholders' meeting (not recognised as liabilities at 31 December) amount to € 909,787.03 (2012: €1,299,695.75). The proposed resolution regarding profits, if approved, will result in the payment of € 0.035 per share (2012: €0.05).

31. Commitments and contingencies

Capital commitments

As at December 31st 2013 and December 31st 2012 the value of the Company's commitments was not material.

Legal litigations

In the course of financial year 2008 the Tax Police made an inspection on financial years 2005 and subsequent. The notification report dated 3.7.2008 did not evidence any irregularities of a certain importance.

On December 14, 2010 the Tax Authorities of Piacenza prepared the assessment notice n° 97036 concerning the observations by the Tax Police regarding financial year 2005. On February 11, 2011 the Company prepared an appeal to the Provincial Tax Commission requesting the cancellation of the observations.

On June 9, 2011 the Tax Authorities of Piacenza prepared the tax assessment report n° 46881 concerning observations made by the Tax Police regarding financial year 2006 and the tax assessment report n° 44746 concerning observations made by the Tax Police regarding financial year 2007. On September 20, 2011 the Company prepared two appeals to the Provincial Tax Commission requesting the cancellation of the majority of the observations.

In relation to the tax assessment report n° 46881 and 44746, a tax collection notice was received at the end of December 2011, paid at the end of February 2012 and booked under non-current receivables for the amount of 164 thousand euros.

On January 30, 2014 the Company and the Tax Authorities signed a conciliation document covering all the assessment notices regarding the Tax Police report. The economic-equity effects, of modest entity, have already been included in the financial statements.

Guarantees granted

Bolzoni S.p.A. has granted the following guarantees at 31st December 2013:

- it has destined some land and buildings as guarantee against two bank loans (see note 16);
- it has granted comfort letters to a bank on a loan given to the subsidiary Bolzoni Auramo Inc. for the amount of US$ 910,000 (2012: US$ 910,000);
- it has granted a surety to a bank for the amount of € 800,000 (2012: € 800,000) in favour of the subsidiary Bolzoni Auramo GmbH;
- it has granted a surety to a bank for the amount of € 1,600,000 (2012: € 1,600,000) in favour of the subsidiary Bolzoni Auramo S.l.;
- it has granted a surety to a bank for the amount of € 1,500,000 (2012: € 1,500,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 650,000 (2012: € 650,000) in favour of the subsidiary Bolzoni Italia S.r.l.;
- it has granted a surety to a bank for the amount of € 2,700,000 (2012: € 2,000,000) in favour of the subsidiary Auramo OY;
- it has granted a surety to a bank for the amount of € 630,000 (2012: € 630,000) in favour of the subsidiary Bolzoni S.a.r.l.;
- it has granted a surety to a bank for the amount of € 304,898 (2012: € 304,898) in favour of the subsidiary Bolzoni S.a.r.l.;
- it has granted a surety to a supplier for the amount of € 100,000 (2012: € 100,000) in favour of the subsidiary Bolzoni Auramo Shanghai;
- it has granted a surety to a bank for the amount of € 950,000 (2012: € 950,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 1,800,000 (2012: € 1,800,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 1,800,000 (2012: € 1,800,000) in favour of the subsidiary Hans H. Meyer GmbH.;
- it has granted a surety to a bank for the amount of € 500,000 (2012: € 500,000) in favour of the subsidiary Hans H. Meyer GmbH;
- it has granted a surety to a bank for the amount of € 2,000,000 (2012: € 0) in favour of the subsidiary Hans H. Meyer GmbH;
- it has granted a surety to a bank for the amount of € 225,000 (2012: € 225,000) in favour of the subsidiary Bolzoni Italia S.r.l.;
- it has granted a surety to a bank for the amount of € 1,100,000 (2012: € 0) in favour of the subsidiary Bolzoni Auramo Wuxi; and
- it has granted a surety to a supplier for the amount of € 500,000 (2012: € 500,000) in favour of another supplier.

32. Disclosure on related parties

The following table indicates the total values of transactions with related parties for the relevant financial year :

Related parties		*Operating and Financial Revenue*	*Operating and Financial expenses*	*Financial and trade receivables*	*Related parties payables*
Subsidiaries	2013	20,134	4,241	11,778	4,746
	2012	20,905	3,595	10,246	6,326
Associates	2013	172	-	37	-
	2012	427	-	545	-
Other related companies : Intesa-Sanpaolo Group	2013	-	-	-	
	2012	-	81	477	2,344

Subsidiary companies

For the breakdown between sales and financial revenue and between sales and financial costs please consult the Management Report. For details on receivables/payables see notes 10, 13, 16 and 20.

Associated companies

The Company has two associated companies: 40.0% interest in Auramo South Africa (2012: 40.0%) held through Auramo Oy and 20.0% interest in XinHuaxin (2012: 20.0%) held through Bolzoni Holding Hong Kong.

Transactions with other related parties

Other related parties

During the first semester of 2013 the Intesa-Sanpaolo Group reduced its stake in the share capital of Bolzoni S.p.A. to under 2% and therefore it is no longer considered a related party (2012: under 5%). A manager of the Intesa-Sanpaolo group (Davide Turco) is a member of the Board of Directors of the company.

Terms and conditions of transactions between related parties

Transactions between related parties are performed at normal market prices and conditions. Outstanding balances at year end are unsecured, interest free and are settled in cash. No guarantees have been provided or received for any related party receivables or payables. For the year ended 31 December 2013 the Company has not made any provision for doubtful debts referring to amounts owed by related parties (2012: Euro 0).

33. Financial risk management: objectives and policies

The Company's principal financial instruments, other than derivatives, include bank loans, short term deposit and cash bank accounts. The main purpose of these financial instruments is to raise funds for the Company's operations. The Company has various other financial instruments, such as trade payables and receivables, which arise directly from its operations.

The main risks arising from the Company's financial instruments are those in connection with interest rates, liquidity, exchange rates and credits. The Board of Directors reviews and agrees on the policies for handling each of these risks and they are summarised below. The Company's accounting principles in relation to derivatives are set out in note 2.3.

Interest rate risk

The interest rate risk originates from medium-long term loans given at floating interest rates. The Company's policy is that no trading in financial instruments shall be undertaken for speculation. Furthermore, the Company intends hedging a part of the existing loans and monitoring, for the remaining part, the trend in interest rates in order to evaluate the opportunity for new hedging.

The Company believes it is exposed to the risk that a possible increase in rates could increase future financial charges. The following table shows the effects that could derive from a 0.25 BPS variation in interest rates.

	Variations in presumptions	*Effect on gross profit before tax*
2013	0.25 BPS	(25)
	-0.25 BPS	25
2012	0.25 BPS	(48)
	-0.25 BPS	48

At December 31, 2013 loans hedged against interest rate risks amounted to 22.6 million euros.

The Company has four Interest Rate Swap contracts running which foresee the exchange of the difference between floating and one or more fixed rate interest amounts, calculated by reference to an agreed notional principal amount. Two IRS contract do not appear to observe the hedging parameters established by the IFRS (see Note 19).

Foreign currency risk

The Company has identified its exposure to foreign currency risks mainly in connection with future collection of amounts in foreign currency (mainly USD) as their subsequent translation could take place at potentially unfavourable conditions, with a negative impact on the year's results The following table shows the sensitivity of profit before tax (due to the variations in the fair value of current assets and liabilities) and net equity towards possible reasonable variations in foreign currency exchange rates, whilst maintaining all the other variables stable.

	Currency	Increase/ Decrease	Effect on gross profit before tax	Effect on Net Equity
2013	*USD*	+ 5%	(141)	(103)
	USD	- 5%	157	114
	GBP	+ 5%	(12)	(9)
	GBP	- 5%	13	9
	$ CAN	+ 5%	(6)	(4)
	$ CAN	- 5%	6	5
2012	*USD*	+ 5%	(193)	(140)
	USD	- 5%	214	155
	GBP	+ 5%	(15)	(11)
	GBP	- 5%	17	12
	$ CAN	+ 5%	(4)	(3)
	$ CAN	- 5%	5	4

The Company has entered into derivative financial contracts which hedge against exchange rate risks produced by cash flow from sales in foreign currency transactions with its American subsidiary Bolzoni Auramo Inc.: more specifically, the instruments used are essentially forward currency contracts and Put options.

As these derivative contracts are generally drawn up after the invoicing of sales or of the purchases generating the related cash flows and as it is not possible to identify a close correlation between the maturity of the derivative contracts and the dates of the underlying financial cash flows, the contracts under examination can therefore be classified as net hedging operations on trade receivables/ payables in foreign currency. Consequently, in the course of the financial period, they have been recognized as financial assets held for trading and are therefore accounted for and assessed at fair value. The fair value variations are charged to income statement under financial income and charges. At December 31st 2013 there are no derivative contracts of this nature.

Following the expansion of its activities on Asian markets, the Company is also exposed to foreign currency risks related to purchases of raw materials settled in both Chinese Yuan (CNY) and US Dollars (USD); the volume of these operations is however minimal.

Risk of variations in price of raw material

The Company's exposure to the price risk is considered to be limited as the Company adopts a policy of partial hedging against the risk of fluctuations in the cost of raw materials thanks to supplier contracts at fixed prices for a period varying from three to six months and which mainly involve steel.

Credit risk

The Company only trades with known and creditworthy customers. The Company has taken out insurance to protect itself from insolvency risks and which covers almost its entire exposure.

With respect to the credit risk arising from the other financial assets of the Company, which include cash and cash equivalents, the maximum risk is equivalent to the carrying amount of these assets in the event of default of the counterparty. These are normally primary domestic and international financial institutions.

There are no significant concentrations of credit risk within the Company

Liquidity risk

The liquidity risk is linked to the difficulty of finding funds to meet the company commitments. It can be caused when available resources are insufficient to meet the financial obligations, according to the established terms and due dates, if a credit line is suddenly revoked or if the Company needs to fulfil its financial payables before their natural due date. Thanks to a careful and cautious financial policy and to continue monitoring of both the balance between the credit lines granted and used, and the balance between short term and medium-long term debts, the Company is provided with lines of credit adequate in quality and quantity to meet its financial needs.

The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, debentures, finance leases and hire purchase contracts with purchase option.

The Company therefore performs a continue check of the estimated financial requirements so that any necessary actions can be promptly taken (finding additional lines of credit, increases in share capital, etc.).

Financial instruments - Fair value

Below is a comparison between the carrying amounts and the fair value of all the Company's financial instruments as indicated in the financial statements, divided according to category:

	Carrying amount		*Fair value*	
	2013	*2012*	*2013*	*2012*
Financial assets				
Financial receivables	5,172	1,200	5,172	1,200
Cash in hand	5,981	1,036	5,981	1,036
Financial liabilities				
Bank overdrafts and advance on notes to be collected	(946)	(1,299)	(946)	(1,299)
Advance on foreign business	(500)	(400)	(500)	(400)
Loans:				
at variable rates	(31,087)	(22,908)	(31,087)	(22,908)
at fixed rates	-	-	-	-
Forward currency contracts	-	-	-	-

Interest rate risk

The following table shows the carrying amount, according to maturity date, of the Company's financial instruments exposed to interest rate risk:

Year ended 31st December 2013

Fixed rate	<1 year	>1<2 yrs	>2<3 yrs	>3<4 yrs	>4<5 yrs	> 5 yrs	Total
Simest loan	-	-	(810)	-	-	-	(810)

Variable rate	<1 year	>1<2 yrs	>2<3 yrs	>3<4 yrs	>4<5 yrs	> 5 yrs	Total
Liquid funds	5,976	-	-	-	-	-	5,976
Overdraft on bank accounts	-	-	-	-	-	-	-
Advance on foreign business	(500)	-	-	-	-	-	(500)
Advance on collectable bills subject to final payment	(946)		-	-	-	-	(946)
Derivatives appraisal	-	(423)	-	-	-	-	(423)

GE Capital loan	(498)	(498)	(250)	-	-	-	(1,246)
Banca Nazionale del Lavoro loan	(670)	-	-	-	-	-	(670)
Banca Popolare loan	-	-	(500)	(1,487)	-	-	(1,987)
Deutsche Bank loan	(989)	(991)	(750)	-	-	-	(2,730)
Non-discounted interest rates	(752)	-	-	-	-	-	(752)

34. Remuneration of Directors and Statutory Auditors

The following table indicates the remuneration of the directors and statutory auditors for the year 2013:

Name	Amount	Description
Emilio Bolzoni	230	Director's fee
Roberto Scotti	290	Director's fee
Luigi Pisani	28	Director's fee
Franco Bolzoni	28	Director's fee
Pierluigi Magnelli	28	Director's fee
Davide Turco	28	Director's fee
Karl Peter Otto Staack	28	Director's fee
Raimondo Cinti	28	Director's fee
Giovanni Salsi	28	Director's fee
Paolo Mazzoni	28	Director's fee
Claudio Berretti	28	Director's fee
Total	**772**	
Giorgio Picone	25	Statutory Auditor's fee
Carlo Baldi	14	Statutory Auditor's fee
Maria Gabriella Anelli	14	Statutory Auditor's fee
Total	**53**	

Benefits, stock option plans are not provided for, nor are any other allowances normally due to directors in the event of early termination of office nor plans for succession of executive directors.

35. Other information

The Company has not carried out any operations to favour the purchase or the subscription of shares in accordance with article 2358, paragraph 3 of the Civil Code.

The Company appointed its auditors in April 2012. Below is a summary of fees paid during the financial period in exchange for services rendered to the Company by the following:

a) by the audit company for auditing services;
b) by the audit company for services other than above, divided between verification services necessary for the issue of certifications and other services, separated according to type;
c) by companies belonging to the auditing company's network, for services divided according to type.

Type of service	*Subject providing the service*	*Fees (thousands of euros)*
Audit	Parent's auditors	61
Tax assistance services	Parent's auditors	7

36. Significant non recurring events and operations

In compliance with Consob's Release N° DEM/6064293 on 28 July 2006, it should be noted that during the course of the financial year 2013 no events occurred and no non-recurring operations were carried out.

37. Transactions deriving from uncharacteristic and/or unusual operations

In compliance with Consob's Release N° DEM/6064293 on 28 July 2006, it should be noted that during the course of the financial year 2013 no transactions were made deriving from uncharacteristic and/or unusual operations.

38. Events after the balance sheet date

No significant events have occurred since the balance sheet date.

AUDITORS' REPORT PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of
BOLZONI S.p.A.

1. We have audited the financial statements of Bolzoni S.p.A. as of December 31, 2013, which comprise the balance sheet, the income statement, the statement of comprehensive income, the statement of changes in equity, the cash flow statement and the related explanatory notes. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's financial statements, whose data are presented for comparative purposes, reference should be made to our auditors' report issued on March 28, 2013. Such comparative data have been revised to take into account of the adoption of the new amendment of IAS 19 – Employee Benefits. These revisions to comparative data and related disclosures included in the explanatory notes have been reviewed by us in order to express our conclusions on the financial statements as of December 31, 2013.

3. In our opinion, the financial statements give a true and fair view of the financial position of Bolzoni S.p.A. as of December 31, 2013, and of the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

4. The Directors of Bolzoni S.p.A. are responsible for the preparation of the Management Report and the Report on Corporate Governance and Ownership Structure published in the section "Investor Relations – Corporate Governance" of Bolzoni S.p.A.'s website, in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the Report on Corporate Governance and Ownership Structure, with the financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the Report on Corporate Governance and Ownership Structure are consistent with the financial statements of Bolzoni S.p.A. as of December 31, 2013.

DELOITTE & TOUCHE S.p.A.
